

SAFETY RECALL

CAMPAIGN BULLETIN

Engine Bearing Preliminary Recall Announcement

Reference: Engine Bearing

Date: July 2, 2025

Attention: Dealer Principal, Sales, Service & Parts Managers

**** Preliminary Announcement ****

Nissan is committed to the safety and security of our customers and passengers. Nissan has notified the National Highway Traffic Safety Administration (NHTSA) that it is conducting a Voluntary Safety Recall Campaign on certain model year 2019-2020 Nissan Altima and 2021-2024 Nissan Rogue vehicles.

Nissan has identified instances of bearing failures in certain vehicles equipped with the 3-cylinder 1.5L or 4-cylinder 2.0L Variable Compression Turbo (VC-Turbo) engines. On affected vehicles, a potential bearing manufacturing defect could result in engine damage and potentially lead to engine failure. If the engine fails while driving, it can result in a loss of motive power.

Dealers will be able to identify the affected vehicles in Service Comm and DBS National Service History beginning July 15, 2025. On that date, a campaign announcement and repair instructions will be released for 2019-2020 model year Altima vehicles. Repair information for 2021-2024 model year Rogue vehicles will be made available on August 22, 2025. No action is required at this time.

NISSAN NORTH AMERICA, INC.

Total Customer Satisfaction

Frequently Asked Questions (FAQ):

Q. What is the repair and how long will it take?

A. On July 15, 2025, a campaign announcement and repair instructions will be released for 2019-2020 model year Altima vehicles. Repair information for 2021-2024 model year Rogue vehicles will be made available on August 22, 2025.

Q. How many vehicles are involved?

A. Approximately 5,685 model year 2019-2020 Nissan Altima vehicles and 348,554 model year 2021-2024 Nissan Rogue vehicles in the USA.

Q. Have there been any reported accidents?

A. Nissan is not aware of any accidents related to this issue.

Q. What is the possible effect of the condition?

A. If the engine fails while driving, it can result in a loss of motive power, increasing the risk of a crash. However, prior to engine failure drivers will receive multiple forms of audible and visible advance warnings, including abnormal noise from the engine compartment, rough running, illumination of malfunction indicator lights, and warning messages in the instrument cluster.

Q. Where can owners with affected vehicles find additional information?

A. Beginning July 15, 2025, owners can contact their local Nissan dealer to find out additional information. In the USA market, customers can also use the Nissan Recall Lookup Tool located at <https://www.nissanusa.com/recalls-vin>.
