Engine Bearing

Voluntary Safety Recall Campaign

Reference: R25D1
Date: November 14, 2025

Attention: Dealer Principal, Sales, Service & Parts Managers

IMPORTANT: It is a violation of Federal law for dealers to sell or deliver new vehicles in their inventory covered by this notification until the campaign's remedy action is performed.

Affected Models/Years:	Affected Population:	Dealer Inventory:	SERVICE COMM Activation date:	Stop Sale In Effect
2021-2023 Rogue (T33)	13,846	NA	November 14, 2025	YES

******* Campaign Summary *******

Nissan is committed to the safety and security of our customers and passengers. Nissan has notified the National Highway Traffic Safety Administration (NHTSA) that it is conducting a Voluntary Safety Recall Campaign on certain model year 2021-2023 Nissan Rogue vehicles identified in Service Comm and DBS National Service History.

Certain model year 2021-2023 Nissan Rogue vehicles previously listed under campaign ID R25A8 will now appear in Service Comm and National Service History under campaign ID R25D1. Nissan is launching inspection and repair activities in phases for potentially affected model year 2021-2023 Nissan Rogue vehicles identified by campaign ID R25A8. The first phase, effective November 14, 2025, will include all model year 2021 Rogue vehicles, as well as used dealer inventory and fleet vehicles for model years 2022-2023. As vehicles become eligible for remedy, they will transition from campaign ID R25A8 to R25D1. Vehicles remaining under campaign ID R25A8 will continue to show as "No Remedy Available" status and remain on Stop Sale.

Nissan has identified instances of bearing failures in certain vehicles equipped with the 3-cylinder 1.5L Variable Compression Turbo (VC-Turbo) engine. These issues may be attributed to a potential manufacturing defect affecting specific engine bearings—namely the main, A-, C-, and L-link bearings—or associated engine components. Such defects can lead to engine damage and, in some cases, complete engine failure.

Bearing degradation typically occurs progressively rather than suddenly. As a result, potentially affected vehicles often exhibit multiple early warning signs, including unusual engine noises, rough engine performance, illumination of the malfunction indicator light (MIL), and warning messages displayed in the instrument cluster. Should the engine fail while the vehicle is in motion, it may result in a loss of motive power (LOMP), thereby increasing the risk of a crash. In certain rare cases, a bearing failure may cause a breach in the engine block, allowing hot oil to be discharged, increasing the risk of an engine fire.

Your Nissan dealer will reprogram the Engine Control Module (ECM) and conduct a test drive. If the inspection determines an engine replacement is necessary, the Nissan dealer will proceed with replacing the engine.

****** What Dealers Should Do******

1. Verify if vehicles are identified by this Voluntary Safety Recall Campaign using Service Comm or DBS National Service History Campaign I.D. **R25D1**.
2. Dealers **must not sell, lease, trade, rent or loan** any vehicles in dealer inventory subject to this recall campaign until after the vehicle has been remedied.
3. Dealers should use the appropriate campaign bulletin to remedy any vehicles subject to this campaign.
4. Once remedied, dealers should submit the claim using the claims coding provided and release the vehicle.

****** Release Schedule ******

Parts & Repair	<p>Campaign ID R25D1: 2021-2023 Rogue Vehicles:</p> <ul style="list-style-type: none">• NTB25-055 (2021 All Vehicles; 2022-2023 Dealer Inventory and Fleet Only)• Certain model year 2021-2023 Nissan Rogue vehicles previously listed under campaign ID R25A8 will now appear in Service Comm and National Service History under campaign ID R25D1. Nissan is launching inspection and repair activities in phases for potentially affected model year 2021-2023 Nissan Rogue vehicles identified by campaign ID R25A8. The first phase, effective November 14, 2025, will include all model year 2021 Rogue vehicles, as well as used dealer inventory and fleet vehicles for model years 2022-2023. As vehicles become eligible for remedy, they will transition from campaign ID R25A8 to R25D1. Vehicles remaining under campaign ID R25A8 will continue to show as "No Remedy Available" status and remain on Stop Sale.<ul style="list-style-type: none">➤ Replacement engines for this recall have been placed on restriction and must be ordered via DBS. Each order requires VCAN approval from the WCC prior to release. To ensure proper processing, the VCAN approval number must be entered in the SVC Dealer Comments section of the order. Orders submitted without the required VCAN approval number will be cancelled.
Owner Notification	<p>Nissan sent interim notification letters to owners of all potentially affected vehicles in August 2025, via U.S. Mail.</p> <p>Once a sufficient quantity of final remedy parts is available, Nissan will send a letter asking owners to bring their vehicle to a Nissan dealer for the inspection, and if necessary, repair.</p>

****** Dealer Responsibility ******

It is the dealer's responsibility to check Service Comm or DBS National Service History using the appropriate Campaign I.D. for the campaign status on each vehicle falling within the range of this voluntary recall campaign which enters the service department for any reason. This includes vehicles purchased from private parties or presented by transient (tourist) owners as well as vehicles in dealer inventory. If a VIN subject to this recall campaign was part of a dealer trade, the letter associated with that VIN should be forwarded to the appropriate dealer for service completion.

NISSAN NORTH AMERICA, INC.

Total Customer Satisfaction

Frequently Asked Questions (FAQ):

Q. Is this a safety recall?

A. Yes.

Q. Is this a Stop Sale?

A. Yes.

Q. What is the reason for the recall?

A. Nissan has identified instances of bearing failures in certain vehicles equipped with the 3-cylinder 1.5L Variable Compression Turbo (VC-Turbo) engine. These issues may be attributed to a potential manufacturing defect affecting specific engine bearings—namely the main, A-, C-, and L-link bearings—or associated engine components. Such defects can lead to engine damage and, in some cases, complete engine failure.

Q. What is the possible effect of the condition?

A. Bearing degradation typically occurs progressively rather than suddenly. As a result, potentially affected vehicles often exhibit multiple early warning signs, including unusual engine noises, rough engine performance, illumination of the malfunction indicator light (MIL), and warning messages displayed in the instrument cluster. Should the engine fail while the vehicle is in motion, it may result in a loss of motive power (LOMP), thereby increasing the risk of a crash. In certain rare cases, a bearing failure may cause a breach in the engine block, allowing hot oil to be discharged, increasing the risk of an engine fire.

Q. What will be the corrective action for this voluntary recall campaign?

A. Nissan is launching the inspection and repair activities for certain model year 2021-2023 Nissan Rogue vehicles previously listed under campaign ID R25A8 and now appear in Service Comm and National Service History under campaign ID R25D1. Nissan is launching inspection and repair activities in phases for potentially affected model year 2021-2023 Nissan Rogue vehicles identified by campaign ID R25A8. The first phase, effective November 14, 2025, will include all model year 2021 Rogue vehicles, as well as used dealer inventory and fleet vehicles for model years 2022-2023. As vehicles become eligible for remedy, they will transition from campaign ID R25A8 to R25D1.

For customers with the 3-cylinder 1.5L VC-Turbo engine in potentially affected model year 2021-2023 Nissan Rogue vehicles, your Nissan dealer will reprogram the Engine Control Module (ECM) and conduct a test drive. If the inspection determines an engine replacement is necessary, your Nissan dealer will proceed with replacing the engine.

Q. How long will the corrective action take?

- A. For model year 2021-2023 Rogue vehicles with the 3-cylinder 1.5L VC-Turbo engine, dealers will reprogram the Engine Control Module (ECM) and conduct a test drive. This inspection should take less than one (1.0) hour to complete. Where the inspection determines an engine replacement is necessary, your Nissan dealer will proceed with replacing the engine. This may take up to fifteen (15) hours to complete. However, for each service, your Nissan dealer may require your vehicle for a longer period of time based upon their work schedule.

Q. When will vehicle owners be notified?

- A. Nissan sent interim notification letters to owners of all potentially affected vehicles in August 2025, via U.S. Mail. Once a sufficient quantity of final remedy parts is available, Nissan will send a letter asking you to bring your vehicle to a Nissan dealer for the inspection, and if necessary, repair.

Q. Is my vehicle safe to drive?

- A. Nissan is continuing to prepare parts to remedy your vehicle. New parts for your vehicle are anticipated to be available in Q4 2025. When a sufficient quantity of final remedy parts is available, Nissan will send a letter asking you to bring your vehicle to a Nissan dealer for the inspection, and if necessary, repair, which will be free of charge for parts and labor.

If you notice unusual engine noises, rough engine performance, illumination of the malfunction indicator light (MIL), or warning messages displayed in the instrument cluster, please contact your Nissan dealer to arrange an appointment for diagnosis.

Q. Is there anything owners can do to mitigate this condition?

- A. No, however, prior to engine failure drivers will receive multiple forms of audible and visible warnings, including abnormal noise from the engine compartment, rough running, illumination of the malfunction indicator lights and warning messages in the instrument cluster. If any of these symptoms occur, Nissan advises owners to contact their nearest Nissan dealer to have their vehicle diagnosed.

Q. Are parts readily available?

- A. Nissan is launching inspection and repair activities in phases for potentially affected model year 2021-2023 Nissan Rogue vehicles. The first phase, effective November 14, 2025, will include all model year 2021 Rogue vehicles, as well as used dealer inventory and fleet vehicles for model years 2022-2023.

Replacement engines for these recalls have been placed on restriction and must be ordered via DBS. Each order requires VCAN approval from the WCC prior to release. To ensure proper processing, the VCAN approval number must be entered in the SVC Dealer Comments section of the order. Orders submitted without the required VCAN approval number will be cancelled.

Q. Will a rental vehicle be provided while the dealer is servicing the vehicle?

A. Please consult your dealer for alternate transportation availability while your vehicle is being serviced. Rental is available upon customer request, while parts are on order.

EXPENSE CODE	DESCRIPTION	AMOUNT
502	Rental Expense	\$260
Contact the Warranty Call Center at 1-800-777-9999 option 1 if additional expense is required. Please refer to WBP23-013 for additional information on application of rental reimbursement.		

Q. Is there any charge for the repair?

A. No, the remedy will be performed for the customer free of charge for parts and labor.

Q. Will I have to take my vehicle back to the selling dealer to have the service performed?

A. No, any authorized Nissan dealer will be able to perform the recall campaign.

Q. I have lost confidence in the vehicle. Will Nissan replace or repurchase the vehicle?

A. Once the remedy is completed, it will fully correct this condition. As the condition will be corrected, there is no basis for repurchasing or replacing your vehicle.

Q. What model year vehicles are involved?

A. Certain model year 2021-2024 Nissan Rogue vehicles manufactured from March 12, 2021, to August 1, 2024.

Q. Are you experiencing this condition on any other Nissan (or INFINITI) models?

A. Yes, certain model year 2019-2020 Nissan Altima vehicles manufactured from May 25, 2018, to December 11, 2019, certain model year 2019-2022 INFINITI QX50 vehicles manufactured from October 6, 2017, to January 10, 2022, and certain model year 2022 INFINITI QX55 vehicles manufactured from February 10, 2021, to January 10, 2022.
