SUBJECT: D041 Range Rover (L405) Front Suspension Knuckle Crack												

JLR North America, LLC has identified that on certain 2016 model year Range Rover vehicles a front suspension upper knuckle joint could develop a crack. In extreme cases where a crack has developed, this may lead to detachment of the upper suspension arm, which under extreme avoidance maneuver use conditions may compromise the vehicle’s controllability and increase the risk of a crash.

Complete parts listed below, not all parts will be required to complete the repair:
