In the course of continuous product monitoring and internal tests, Automobili Lamborghini S.p.A. has determined that a defect that relates to motor vehicle safety exists in certain Urus SE model year 2025.

In the affected vehicles, the high-pressure fuel pump may not be properly fastened to the cylinder head during assembly. If the sealing connection is not secure, fuel can escape under high pressure. This may result in a sudden and substantial fuel leak, which increases the risk of a vehicle fire.

For the reasons listed above, Automobili Lamborghini decided to launch a safety recall campaign to rework the cars involved.

This campaign is now available on LIASS.

In order to further support you in answering questions to your customers, we are attaching the FAQ (Frequently Asked Questions) form. Since these activities are extremely important, we are confident you will make every effort to ensure that the vehicles are repaired in the shortest time possible.
