

New Safety Recall Advanced Communication – A2C

FCA US LLC (FCA US) has announced a safety recall on certain 2020 through 2025 Model Year (GA) Alfa Romeo Giulia and 2020 through 2025 Model Year (GU) Alfa Romeo Stelvio vehicles.

VINs identified as being involved in this campaign are currently live and searchable.
Stop sale is in effect for the above-identified vehicles.

Vehicles impacted by a stop sale are eligible for reimbursement allowance through the Recall Floorplan Reimbursement Policy (RFPRP), which can be requested upon recall claim submission.

IMPORTANT: Some of the involved vehicles may be in dealer new vehicle inventory. Federal law requires you to complete this recall service on these vehicles before retail delivery. Violation of this requirement by a dealer could result in a civil penalty of up to \$27,874 per vehicle. Involved vehicles can be determined by using the VIP inquiry process.

REASON FOR THIS SAFETY RECALL

Some of the above vehicles may have been built with a Printed Circuit Board (PCB) defect and/or a software defect, which may result in the rearview image not displaying in a backing event. Failure to display a rearview image can increase the risk of a crash.

The condition described above does not comply with Federal Motor Vehicle Safety Standard (FMVSS) No. 571.111 S6.2.6 requires that "The rear visibility system default to the rearview image being visible and meet the requirements of FMVSS No. 571.111 S6.2.1 (field of view) and S6.2.2 (image size) at the beginning of each backing event, regardless of any modifications to the field of view that the driver had previously selected." Suspect vehicles may not display the rearview image during a backing event under certain conditions.

SERVICE ACTION

FCA US will conduct a voluntary safety recall to inspect the radio, and if necessary, replace it with a radio at the latest software level. If the radio passes inspection, a software update will be performed. The remedy for this condition is not currently available. Dealers will be notified of the launch of this safety recall by way of established communication methods. This recall is estimated to launch in 4th Quarter of 2025.

We ask that you please take the time to ensure that your personnel are aware of this communication and are prepared to execute a customer friendly process for inquiries regarding involved vehicles.
