

## **New Safety Recall Advanced Communication – A0C**

FCA US LLC (FCA US) has announced a safety recall on certain 2013-2016 model year (PF) Dodge Dart vehicles equipped with automatic transmission.

### **REASON FOR THIS SAFETY RECALL**

Some of the above vehicles may experience a transmission shift cable failure. A failure of the shift cable to maintain connection to the transmission can cause an unexpected and unrecoverable Loss of PARK (LoP) function and/or a vehicle movement in an unintended direction. A LoP function and/or vehicle movement in an unintended direction can cause a vehicle crash without prior warning and/or injury to others outside the vehicle.

### **SERVICE ACTION**

FCA US will conduct a voluntary safety recall on all affected vehicles. The remedy is under development. Dealers will be notified of the launch of this safety recall by way of established communication methods.

We ask that you please take the time to ensure that your personnel are aware of this communication and are prepared to execute a customer friendly process for inquiries regarding involved vehicles.
