

New Safety Recall Advanced Communication – 68C

FCA US LLC (FCA US) has announced a safety recall on certain 2020-2025 model year Jeep Wrangler Plug-in Hybrid Electric Vehicles (PHEVs) and 2022-2026 model year Jeep Grand Cherokee PHEVs.

REASON FOR THIS SAFETY RECALL

Some of the above vehicles may have been built with a high voltage (HV) battery manufactured with cells which may be susceptible to separator damage. In rare circumstances, a battery pack may contain cells with separator damage. Separator damage, combined with other complex interactions within the cells, may lead to a vehicle fire. A vehicle fire can result in increased risk of occupant injury and injury to persons outside the vehicle.

Vehicle risk is reduced when the battery charge level is depleted. Accordingly, owners are advised to refrain from recharging. Out of an abundance of caution, FCA US is also advising owners of these vehicles to park away from structures or other vehicles until the remedy is obtained.

SERVICE ACTION

FCA US will conduct a voluntary safety recall. Remedy is under development and not currently available. Dealers will be notified of the launch of this safety recall by way of established communication methods. This recall is estimated to launch in 1st Quarter of 2026.

We ask that you please take the time to ensure that your personnel are aware of this communication and are prepared to execute a customer friendly process for inquiries regarding involved vehicles.
