Re: Stop Sale/Safety Recall: 2023-2025 Accord Hybrid ICM Software Update

On November 13, 2025, American Honda notified NHTSA of a **stop sale** and **safety recall** for certain 2023-2025 Accord Hybrid vehicles. A software programming issue may cause the Integrated Control Module (ICM) to unintentionally reset, resulting in a loss of on-board diagnostic (OBD) data, the activation of multiple diagnostic trouble codes (DTCs), and sudden loss of vehicle power, which could increase the risk of a crash or injury. **Refer to your eResponsibility report or perform an iN VIN status inquiry to determine which units in your inventory are affected.**

**REPAIR**

Update the ICM software.

**SOFTWARE**

The updated software will be available at launch.

**PARTS**

There are no parts needed for this recall.

**TOOLS**

There are no new special tools needed for this recall.

**SERVICE BULLETIN**

Service Bulletin 25-090, *Safety Recall: 2023-2025 Accord Hybrid ICM Software Update* posted to the Service Information System (SIS) as of November 14, 2025. It includes software repair and warranty claim information related to this recall.

**CUSTOMER NOTIFICATION**

American Honda expects to begin customer notification in early January 2026.

As always, perform an iN VIN status inquiry for all vehicles passing through your dealership to determine eligibility for any open campaigns.
