

 [Recall 286 - Fuel Tank - Dealer Notification \(No Remedy\)_\(posted on 11.18.25\).pdf](#)

Hyundai Motor America (HMA) has launched Remedy Not Available for this recall. An update will be provided once a remedy is available.

As required by federal law, dealers must not deliver new vehicles for sale or for lease to customers until all open recalls have been performed. Dealers must perform all open recalls on used vehicles, demo, and rental vehicles prior to placing them into customer use and whenever an affected vehicle is in the shop for any maintenance or repair.

A. Affected Vehicles:

- Certain 2020-22MY Sonata (DN8A) equipped with 1.6T engines produced 10/22/2019 – 02/17/2022 and built by Hyundai Motor Manufacturing Alabama ("HMMA")
- Certain 2021-23MY Sonata (DN8) vehicles equipped with 1.6T engines produced 04/02/2021 – 10/07/2023 and built by Hyundai Motor Company ("HMC")
- VIN Identification: Use the 'Vehicle Information' screen in WebDCS under the 'Campaign Not Performed' section to determine recall applicability.

B. Recall Description:

The fuel tank assembly in the subject vehicles may become pressurized with compressed air due to a worn purge control system check valve causing the tank to deform. Deformation of the fuel tank can lead to fuel leakage over time. The presence of leaked or accumulated fuel near an ignition source can increase the risk of a vehicle fire.

C. Campaign Documents:

1. Dealer Notification

- Available on HyundaiDealer.com > Service > HMA Tech Info > Service News

D. Important Notes:

1. Review if any vehicles are currently at dealer's location in dealer stock. **Do not sell any vehicles identified with an open recall.**
2. The remedy is currently in development. An update will be provided once a remedy is available.

We appreciate your continued partnership and commitment to our Hyundai customers.
Thank you for your patience and understanding.
