DEALER RECALL NOTICE

Subject: Recall Notice - Cargo Carrying Capacity (CCC) and Tire & Loading Information Label Verification

nuCamp Recall No.: CCC-25

Date: 11/10/2025

Models Affected: TAG, TAB 320, TAB 360, TAB 400 (All Variants)

Production Dates: May 26, 2025 - October 16, 2025

Dear Dealer Partner,

This notice is being issued in accordance with the National Traffic and Motor Vehicle Safety Act.

nuCamp has determined that certain TAG, TAB 320, TAB 360, and TAB 400 trailers built between May 26, 2025, and October 16, 2025 may contain incorrect Cargo Carrying Capacity (CCC) and/or Tire & Loading Information labels.

This originated when the label production method transitioned to sheet-format printing, resulting in potential misprints on weight data.

Incorrect CCC or Tire & Loading Information may cause a customer to overload their trailer, increasing the risk of a crash.

VINs that are registered retail sold prior to this announcement will be notified by nuCamp and provided replacement stickers in a single mailing to the registered owner. Owners may choose to install the labels themselves using the provided instructions or schedule an appointment with an authorized nuCamp dealer to have the labels applied at no cost.

Dealer Inspection and Corrective Action

Dealers must inspect all nuCamp trailers currently in their possession to verify that the CCC and Tire & Loading Information labels fall within the correct range for each model as listed below.

Step 1 - Locate the labels

- **CCC Label:** Interior frame of the entry door.
- **Tire & Loading Label:** Exterior drivers' side, sidewall.

Step 2 - Provide Photo Documentation

Upload clear photos of both existing labels (CCC and Tire & Loading) to the Dealer Portal under the VINs existing Pre-Authorization for verification and approval.

Step 3 - Replace Labels (Upon Approval)

nuCamp will provide the replacement labels. Once labels are received:

- Clean the surface with isopropyl alcohol and a clean rag.
- Apply the corrected labels directly over the originals.
- Ensure proper alignment and adhesion (no air bubbles).

Step 4 - Completion Photos and Claim Submission

- Upload final photos of both new labels to the Pre-Authorization for validation.
- Once reviewed, proceed to claim processing using the approved labor codes below.

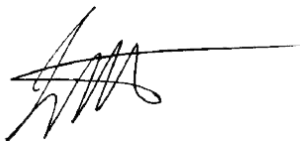

Operation Code	Description	Time Allowed
CCC-25-101	CCC & Tire and Loading Information Stickers - Administrative Labor	0.2 hr
CCC-25-102	CCC & Tire and Loading Information Stickers - Replacement Labor	0.2 hr

Pre-Authorizations are available under your Dealer IDs in the nuCamp Portal. All submissions must include "before" and "after" photos for processing completion and claim payment.

Important Notes

- Replacement labels will be issued by nuCamp Compliance upon verification in the Pre-Authorization
- All affected units must be corrected prior to retail delivery and within the next 90 days.

We appreciate your prompt attention and cooperation in addressing this recall. If you have any questions, please contact the nuCamp Warranty Team.

Thank you,
The nuCamp Warranty Team
