Dear Husqvarna motorcycle customer,

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act. Husqvarna Mobility North America, Inc. has determined that a defect which relates to motor vehicle safety exists with certain 2022, 2023 and 2024 Husqvarna motorcycles equipped with BRAKTEC front brake calipers.

Irregularities were found in the casting structure of one of our brake supplier's subcontractors. In the worst case, this can lead to the front brake caliper cracking in the area around the upper guide pin on affected front brake calipers.

If the front brake caliper cracks at the upper guide pin it may reduce the braking systems effectiveness.

To remedy this defect, it is necessary to have the front brake caliper inspected by an authorized Husqvarna motorcycles dealer to verify which supplier produced the front brake caliper that is mounted on your motorcycle to determine if it is defective or not defective.

- If during the inspection your front brake caliper is determined to not be defective then the front brake caliper will not be replaced.
- If during the inspection your front brake caliper is determined to be defective then the front brake caliper will be replaced.

Please contact your authorized Husqvarna motorcycles dealer (log onto [www.husqvarna-motorcycles.com](http://www.husqvarna-motorcycles.com) for a complete dealer listing) as soon as possible to arrange having the front brake caliper inspected and replaced if necessary. It is suggested that you call your local authorized Husqvarna motorcycles dealer to make an appointment to have the recall repair performed. The procedure will take approximately 30 minutes. However, it may be necessary to leave your motorcycle with the dealer for a longer period of time depending on their work schedule and if they need to order replacement parts.
