

## IMPORTANT SAFETY RECALL

**NHTSA Recall No. 25V138**

**April 18, 2025**

Dear [REDACTED],

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

Motiv Power Systems has decided that a safety defect, which relates to motor vehicle safety, exists in certain 2017 Model Year through 2023 Model Year Motiv vehicles.

**This notice applies to your vehicle:** See Page 3 for affected VINs

**Vehicles Affected:**

- Motiv EPIC4, Gen 4 / E-450, F-59 Chassis / 2017-2020
- Motiv Gen 5 / E-450, F-53, F-59 Chassis / 2020-2023

**National Highway Traffic Safety Administration Recall Number:**

25V138 – TPS Wire Crimp for School Bus vehicles (note that 25V137 covers non-School Bus vehicles).

**Why your vehicle is being recalled**

Motiv Power Systems, Inc. has determined that on certain School Bus vehicles converted to a Motiv electric powertrain, a Throttle Position Sensor (TPS) power wire connector pin at the Powertrain Control Module (PCM) connector could loosen over time, potentially resulting in loss of connection and loss of TPS signal to the PCM. This in turn could result in a loss of vehicle propulsion. Loss of propulsion while the vehicle is in motion could increase the risk of a crash. The operator may not receive a warning in advance of the loss of power.

**What Motiv will do**

Motiv field support technicians will inspect all potentially affected vehicles to ensure proper connection and replace the TPS / PCM connector cable with a more robust solution. There will be no charge for this service. In the unlikely event that the vehicle owner has previously incurred costs to remedy this potential defect, Motiv will reimburse the owner for reasonable costs of that repair.

**When will replacement TPS / PCM Connector Cables be available**

Replacement cables, with improved cable and connector retention, are expected to be available by May 16<sup>th</sup>, 2025.

**What should you do**

Contact your Motiv Customer Support Technician to schedule an inspection of the TPS / PCM cable connector on your vehicle. Inspections are being scheduled after May 16<sup>th</sup>, 2025.

**If you need further help**

If you have questions or concerns your Motiv Customer Support Technician cannot resolve, please reach out to Motiv Customer Service at 1-650-458-4804.

**How long will the repair take**

It is expected that the repair should be completed within one (1) hour. Additional time may be required depending on the service schedules of the Motiv Customer Support Technicians.

**Lease vehicles and address changes**

If you are the lessor and registered owner of the vehicle identified in this action, the law requires you to forward this letter immediately via first-class mail to the lessee within ten (10) days of receipt. If you have changed your address or sold the vehicle, please call 650-458-4804 to notify us so we can update our records.

**What should you do if you have additional questions**

If you have any questions or concerns, please contact Motiv Customer Service by calling 650-458-4804.

If you believe we have not done our best to remedy this condition, without charge or within a reasonable time, you may file a complaint with:

Administrator, National Highway Traffic Safety Administration  
1200 New Jersey Avenue, SE.  
Washington, DC 20590

Or you may call the toll-free Vehicle Safety Hotline at:  
1-888-327-4236 (TTY: 1-800-424-9153); or to go <http://www.safercar.gov>

We apologize for the inconvenience caused by this issue. Your safety continues to be our highest priority, and we remain committed to ensuring your continued satisfaction with your Motiv vehicle.

Sincerely,

Motiv Power Systems
