IMPORTANT SAFETY RECALL

Date: 6/18/2025

Re: Vanguard National Trailer Corporation Safety Recall 25V-385.

This notice applies to your Vehicle Identification Number (VIN) listed in the attached Spreadsheet Listing.

Dear Valued Customer,

This notice is being sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

Vanguard National Trailer Corporation has decided that a defect, which relates to motor vehicle safety, exists in certain 2021, 2022, and 2023 model year 28-foot Dry Van equipped with rear Pintle Hooks.

This defect is specific to the trailers noted herein and pertains only to the population outlined in this notice. It does not pertain to any other Vanguard trailers that are not identified in this listing.

2,192 Units were produced for Yellow Corporation as the original purchaser of the trailers.

Estes Express Lines purchased 2,060 of the said units from Yellow Corporation after Yellow filed Chapter 11 Bankruptcy and sold off some of their equipment at auction.

A VIN number listing is provided noting all units that were purchased by Estes Express Lines and are in currently in their possession/ownership. As such, we are notifying Estes Express Lines separately herein regarding their specific population of 2,060 effected units in this safety recall.

Trailers equipped with these specific Pintle Box assemblies may experience cracking in the Pintle Box attachment points to the frame of the trailer.

This cracking, if severe, can cause the Pintle Box assembly to become unsupported or become dislodged causing loss of control and increasing the risk of a crash.

This concern exists only when trailer Pintle Hook assembly is in use for towing additional equipment.

It has no effect when the trailer is operated as a single unit with no additional equipment attached to the Pintle Hook. The unit should still be subjected to the inspection and repair procedures herein.

In an abundance of caution, the trailer should be placed out of service until inspected and the repairs described herein are performed. The unit can be transported safely for repairs as a single unit but should not be used to pull any other trailing equipment until repaired.

What Vanguard National Trailer Corporation Will Do for you:

1. Vanguard has developed the included remedy/repair outlined in the attached repair procedure. All repairs should be performed in accordance with these instructions.
2. Vanguard will supply repair parts and hardware kits to complete the repairs outlined in the attached procedure. Materials will be shipped at no charge when Vanguard is notified by the owner as to the location of the eligible trailer(s) requiring repair.
3. Vanguard will inspect, weld the cracks and add support brackets as necessary, free of charge.
4. Vanguard will reimburse the end user for the repairs at a rate of \$90.00 per hour.
5. 2.0 hours is the allowable repair time per unit.
6. If you had this repair performed before you received this letter, you may be eligible to receive reimbursement for the cost of obtaining a pre-notification remedy of the problem associated with this recall.
7. All repairs should be reviewed in advance by contacting the Warranty Department @ Vanguard National Trailer. Repair Part Kits & Invoicing information can also be provided at that time to assist in the repairs.

General Switchboard – 219-253-2000

If you do not receive recall services to remedy this defect without charge, or within a reasonable amount of time, you may submit a written complaint to: Administrator, National Highway Traffic Safety Administration, 1200 New Jersey AVE SE, Washington DC 20590. You may also call the toll-free Vehicle Safety Hotline @ 1-888-377-4236 (TTY: 1-888-275-9171); or go to <http://www.safercar.gov>.

If you are a Lessor, federal law requires that you forward a copy of this safety recall notice to the Lessee within 10 days.

We regret any inconvenience that this situation may cause you. Vanguard National Trailer Corporation wants to assure you that we are concerned about customer safety and to your continued satisfaction with our products.

Sincerely,

Mitchell A. Robbins

Warranty Manager

Vanguard National Trailer Corp.

INSTRUCTIONS FOR REINFORCING PINTLE HOOK CROSSMEMBER

NOTE: This instruction is specific to one design of single axle suspension boxes. If there is a question of applicability, verify the trailer VIN with Vanguard prior to performing this instruction.

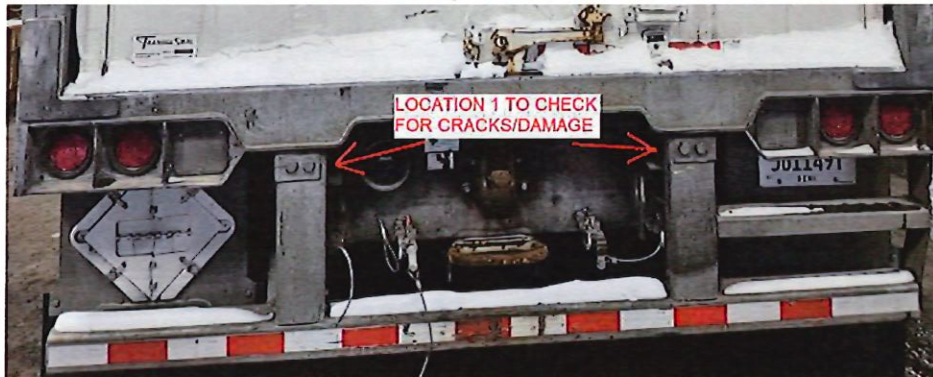

STEP 1: CHECK FOR CRACKS OR DAMAGE IN TWO LOCATIONS

There are two locations on each side of the trailer to check for cracks and/or damage on the pintle hook crossmember assembly.

Location 1:

- From the rear of the trailer, look at the pintle box assembly under the rear sill and behind the rear impact guard (RIG) vertical support as shown in Figure 1 below.

Figure 1

- On each side of the trailer, look at the area between the two bolt access holes in the lower flange of the C-channel. An example of a crack is shown in Figure 2 for reference.

Figure 2

Location 2:

- From underneath the trailer, move into a position to look up at the forwardmost side of the pintle box crossmember. The area where the pintle box assembly end plate connects to the suspension C-channel is the area to inspect on both sides of the trailer. A screenshot of a 3D model is shown in Figure 3 indicating Location 2 to check for cracks and/or damage. An example of a crack in this location is shown in Figure 4.

Figure 3

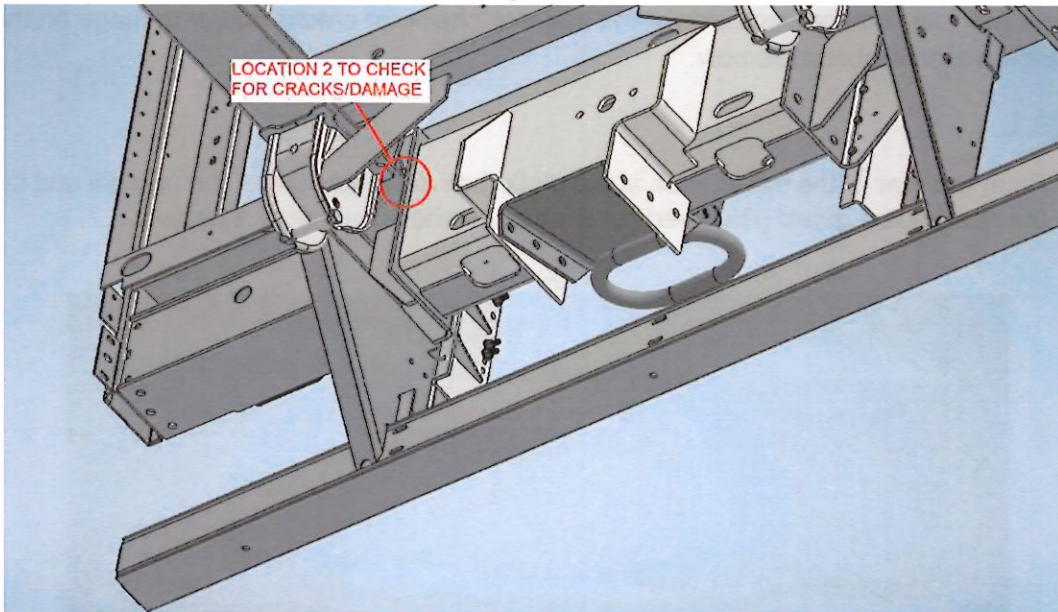

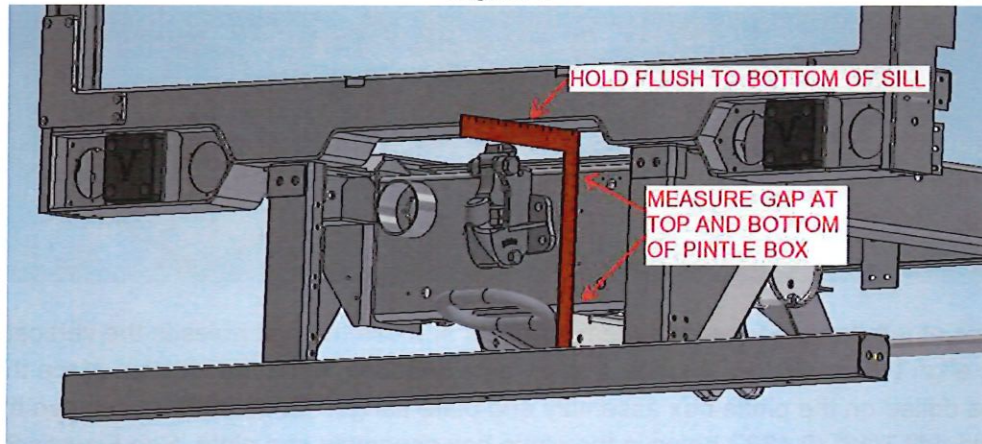

Figure 4

STEP 2: VERIFY PINTLE BOX ASSEMBLY IS SQUARE WITH REAR SILL/FRAME

Using a carpenter's square or similar tool, hold one side flush to the bottom of the rear sill and slide the other side against the pintle box. Measure any gap at the top and bottom of the pintle box assembly as shown in Figure 5. If the gap measures more than $\frac{1}{4}$ " in either location, further review of the assembly may be necessary prior to moving forward with reinforcement.

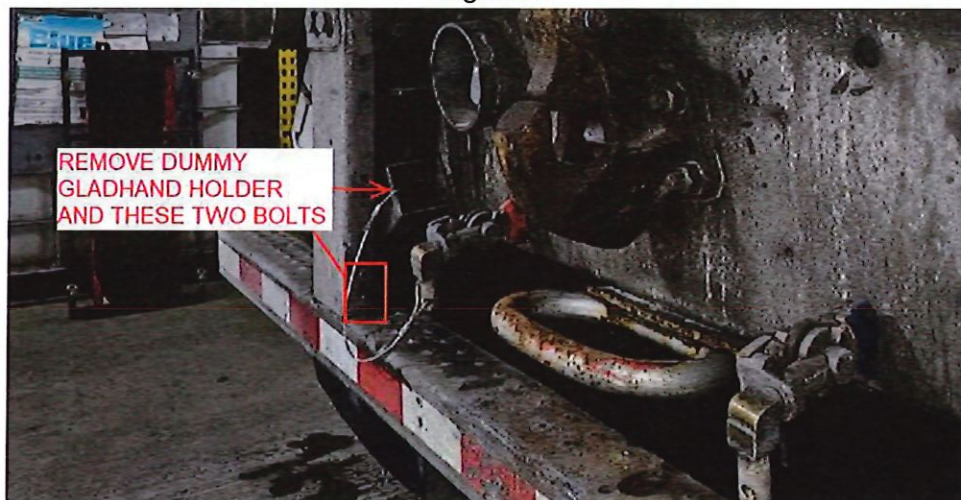

Figure 5

STEP 3: INSTALL REINFORCEMENT BRACKETS

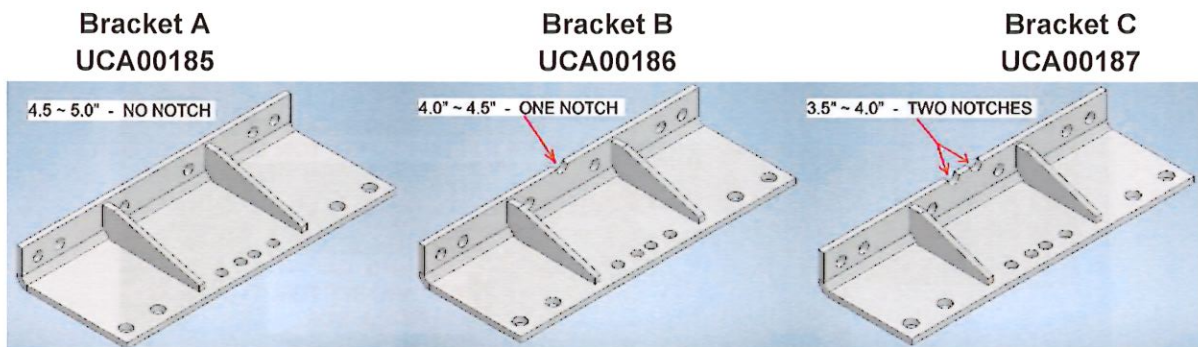

Starting on one side of the trailer, remove the dummy gladhand holder (keep this hardware) and the two bolts at the bottom of the vertical RIG support shown in Figure 6.

Figure 6

Previously, each trailer had a measurement taken from the face of the pintle box end plate to a mounting hole on the vertical RIG support. Based on that measurement, there are different versions of the bracket to be used in this instruction. See Figure 7 below for examples of each.

Figure 7

Hold up one of the provided reinforcement brackets and use the bolt holes in the vertical RIG support to align the bracket. Using the bracket as a template, mark the location of the three holes to be drilled on the pintle box assembly end plate flange. Once marked, remove the bracket and drill 7/16" (0.438") holes in the pintle box assembly end plate. See Figures 8 & 9 below.

- NOTE: When aligning the bolt holes with the vertical RIG support, there may be a gap between the bracket and the pintle box end plate flange. This is ok and will be filled with spacer plates later.

Figure 8

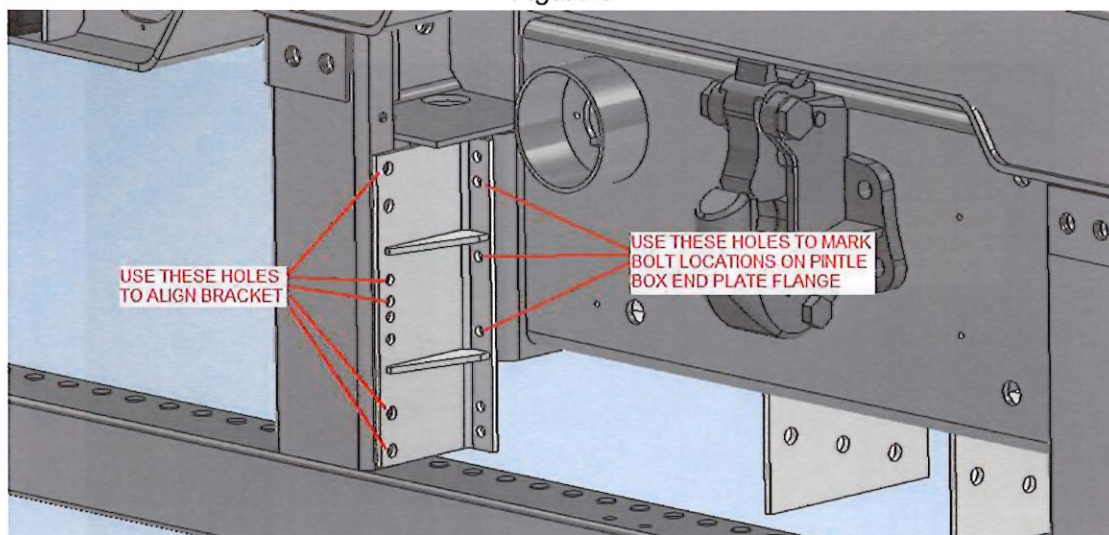

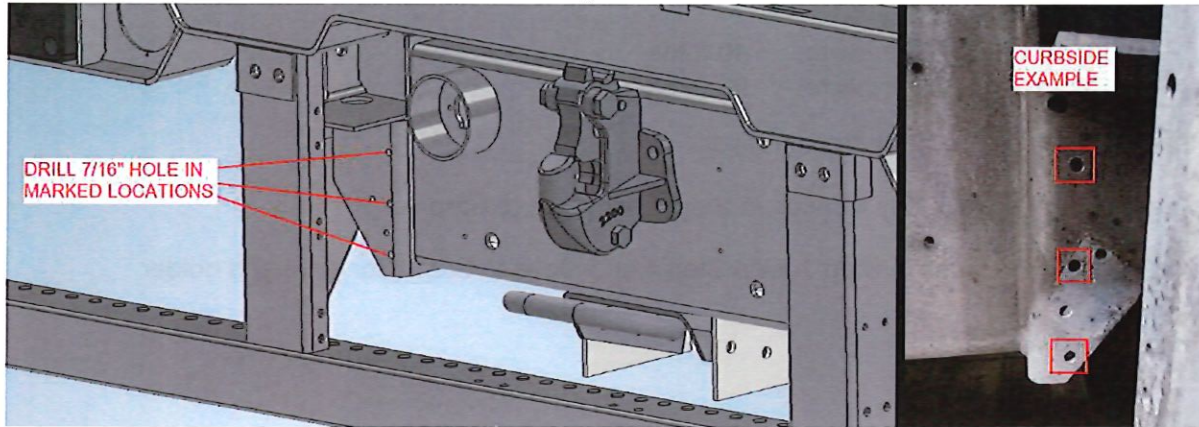

Figure 9

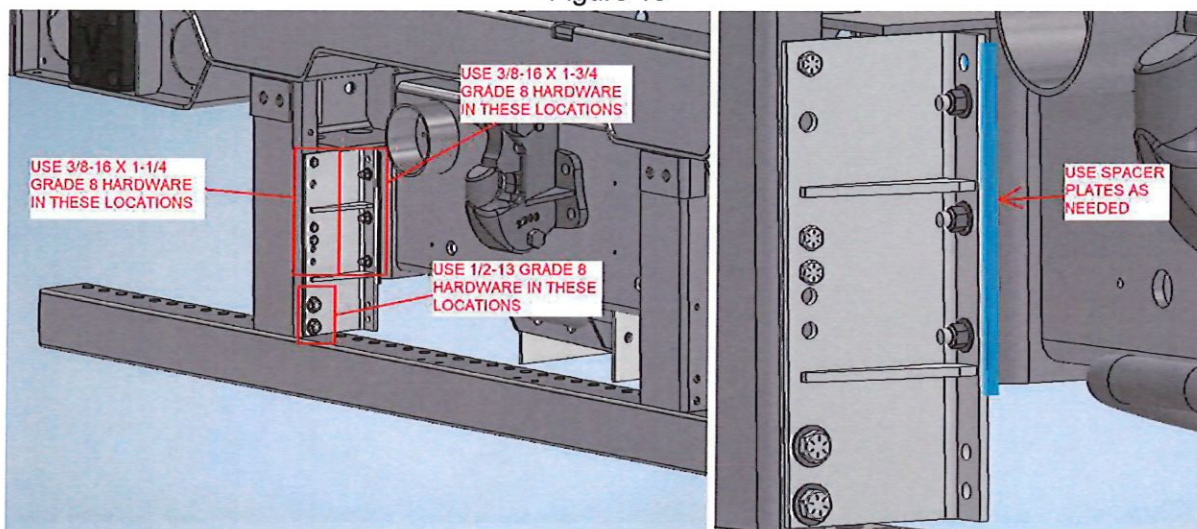

After drilling the bolt holes in the pintle box end plate flange, mount the reinforcement bracket using 3/8-16 and 1/2-13 Grade 8 hardware. Three sets of 3/8-16 x 1-1/4, three sets of 3/8-16 x 1-3/4, and two sets of 1/2-13 x 2 hardware are to be used. See Figure 10 for locations.

- NOTES:

- o If there was a gap between the bracket and pintle box end plate found when marking hole locations, install spacer plates as needed. See Figure 10 right side.
- o Loosening all the bolts that mount the horizontal RIG bumper may help to align all the bolt holes for the reinforcement bracket.

Figure 10

Torque values:

- 3/8-16 Grade 8 hardware: 40 ft-lbs
- 1/2-13 Grade 8 hardware: 95 ft-lbs

Repeat Step 3 on the other side of trailer.

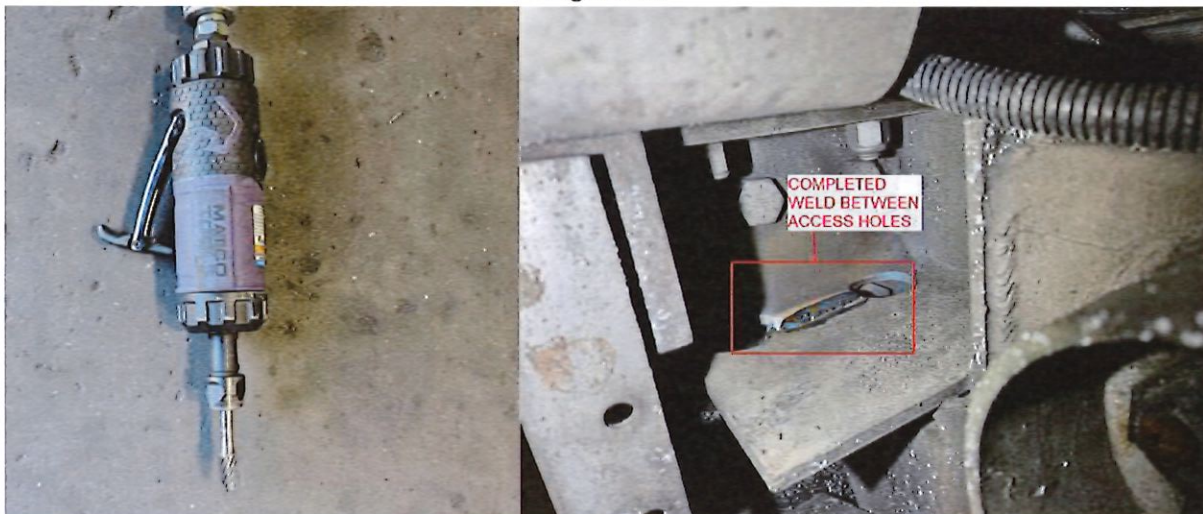

If cracks were found in any location in Step 1, move on to Step 4.

If no cracks were found in Step 1, skip Step 4 and move to Step 5 for gladhand holder installation.

STEP 4: REPAIR CRACKS FOUND IN STEP 1

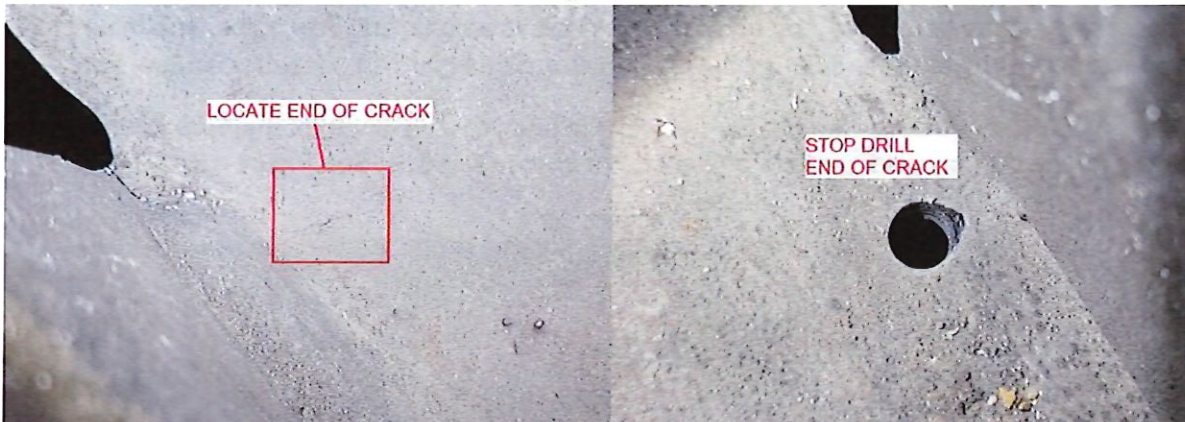

If cracks/damage were found in Location 1 from Step 1, use a die grinder with burr bit (see Figure 10 left) to gouge out the crack. If desired, a full cut can be made between the two bolt access holes to stop the crack from continuing. Clean off dirt/debris and galvanizing as best as possible and weld the gouged or cut area from the top. Clean off welded area and spray with cold galvanizing. An example of a completed weld, prior to cold galvanizing, is shown on the right side of Figure 11 below. Repeat on other side of trailer as necessary.

Figure 11

If cracks/damage were found in Location 2 from Step 1, locate the end of the crack and stop drill the crack with a 1/4" hole. See Figure 12 below. If the end of the crack is not accessible to drilling, proceed without stop drilling.

Figure 12

After stop drilling the crack or if the end of the crack is not accessible, use the die grinder and burr bit to gouge out the full length of the crack. If stop drilling was not possible due to location of the crack, gouge 1/2" beyond the end of the crack. After gouging, weld along the full length. Figure 13 shows an example of a gouged and welded crack prior to cold galvanizing. Clean off dirt/debris and galvanizing as best as possible and weld the gouged area. Clean off welded area and spray with cold galvanizing. Repeat on other side of trailer as necessary.

Figure 13

STEP 5: MOUNT DUMMY GLADHAND HOLDER

After reinforcement brackets are installed, the dummy gladhand holders can be reinstalled in the open holes at the bottom of the reinforcement bracket on each side of the trailer. Using the same face of the square tube that the lanyard is crimped on, hold gladhand holder against bracket and ensure lanyard is long enough. Mark hole locations, drill new holes, and mount to reinforcement bracket using 3/8-16 x 2-1/2 hardware. See Figure 14. Repeat on other side.

- NOTE: Mount bolts with head on outside as shown. The length of the bolts act as a stop for the dummy gladhands to prevent them from falling out. See Figure 15.

Figure 14

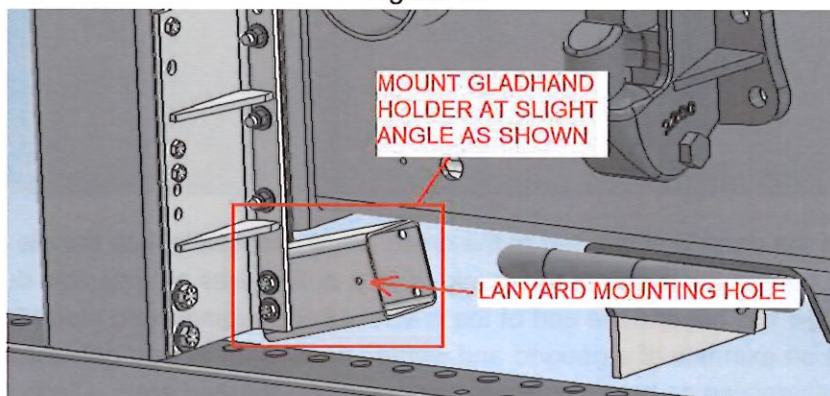

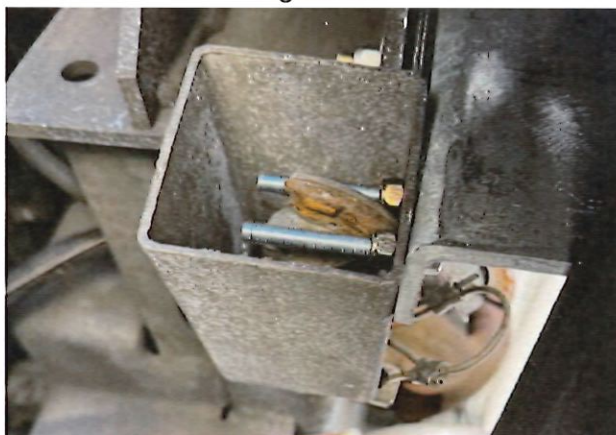

Figure 15
