Certain 2024 and 2025 Model Year Porsche Panamera and Taycan Vehicles Porsche Recall ASA6 / NHTSA ID 25V-415

Dear [REDACTED]

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act. Porsche has decided that a defect, which relates to motor vehicle safety, exists in certain 2024 and 2025 model year Porsche Panamera and Taycan vehicles.

What is the issue?

Porsche recently determined that, due to a manufacturing error, the retaining ring on the top of the front air suspension struts could loosen over time. If this occurs, the vehicle can experience a drop in ride height and degradation in handling, increasing the risk of a crash.

What will Porsche do?

To remedy this issue, your Porsche Center will check the affected front air suspension struts, and rework them if necessary, **all at no charge to you**. The remedy will take approximately one day to complete, but it may be necessary to make your vehicle available to your Porsche Center for a longer period of time. Your Porsche Center will arrange for alternate transportation if necessary.

What should you do?

The remedy for this Recall is now available. Please contact any authorized Porsche Center to schedule an appointment to have this recall performed as soon as possible and to arrange for Porsche- provided alternate transportation, if necessary.
