Get access to recall notifications, locate your nearest dealer, and more through this website or Mopar Owner's Companion App. You will be asked to provide your Vehicle Identification Number (VIN) to protect and verify your identity. The last eight characters of your VIN are provided above.

#### DEALERSHIP INSTRUCTIONS

Please reference Safety Recall 14C.

# IMPORTANT SAFETY RECALL

## Airbag Warning Light - Clockspring

Dear [Name],

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

FCA US LLC has decided that certain [2021-2022 Model Year (DS) Ram 1500 Classic vehicles, 2021-2022 Model Year (DJ) Ram 2500 vehicles, 2021-2022 Model Year (D2) Ram 3500 vehicles, 2021-2022 Model Year (DD) Ram 3500 Cab Chassis vehicles, 2021-2022 Model Year (DF) Ram 3500 Cab Chassis vehicles, with a gross vehicle weight rating (GVWR) less than 10,000 lbs., 2021-2022 Model Year (DP) Ram 4500 Cab Chassis vehicles, and 2021-2022 Model Year (DP) Ram 5500 Cab Chassis vehicles] vehicles fail to comply with Federal Motor Vehicle Safety Standard (FMVSS) No. 208 - Occupant crash protection.

It is extremely important to take steps now to repair your vehicle to ensure the safety of you and your passengers.

#### WHY DOES MY VEHICLE NEED REPAIRS?

The Steering Column Control Module (SCCM) on your vehicle <sup>[1]</sup> may have been built with an insufficient weld between an internal flexible flat cable (FFC) and busbar, which can illuminate the airbag warning light and stop a deployment signal from the Occupant Restraint Controller from reaching the driver airbag module, preventing airbag deployment when directed. **An airbag that does not deploy when intended may result in increased risk of injury to the driver in certain crashes.**

The condition above fails to comply with the requirements of FMVSS No. 208 which requires driver's airbag deployment during certain crash events. Suspect SCCMs may prevent airbag deployment during these events.

#### HOW DO I RESOLVE THIS IMPORTANT SAFETY ISSUE?

FCA US LLC will repair your vehicle <sup>[2]</sup> free of charge (parts and labor). To do this, your dealer will replace the SCCM. The estimated repair time is 45 minutes. In addition, your dealer will require your vehicle for proper check-in, preparation, and check-out during your visit, which may require more time. Your time is important to us, so we recommend that you schedule a service appointment to minimize your inconvenience. Ask your dealer for alternate transportation options while your vehicle is in service. Please bring this letter with you to your dealership.

**TO SCHEDULE YOUR FREE REPAIR,  
CALL YOUR CHRYSLER, JEEP®, DODGE OR RAM DEALER TODAY**

#### WHAT IF I ALREADY PAID TO HAVE THIS REPAIR COMPLETED?

If you have already experienced this specific condition and have paid to have it repaired, you may visit [www.fcarecallreimbursement.com](https://www.fcarecallreimbursement.com) to submit your reimbursement request online. <sup>[3]</sup> Once we receive and verify the required documents, reimbursement will be sent to you within 60 days. If you have had previous repairs performed and/or already received reimbursement, you may still need to have the recall repair performed.

We apologize for any inconvenience, but are sincerely concerned about your safety. Thank you for your attention to this important matter.
