This notice applies to your vehicle, **VIN:** _____.

Dear General Motors Customer:

Why is your vehicle being recalled?

The front passenger airbag connection in these vehicles may have an improper wire crimp, which under some conditions could interfere with signals to the airbag. In certain frontal crashes the passenger airbag may not deploy as designed, increasing the risk of passenger injury.

What will we do?

Your GM dealer will install a jumper harness that replaces the section of the instrument panel harness that includes the passenger front airbag connector, free of charge. Because of service scheduling requirements, it is likely that your dealer will need your vehicle longer than the actual service correction time of approximately 1 hour.

What should you do?

You should contact your GM dealer to arrange a service appointment as soon as possible.

When scheduling your appointment, confirm with the dealer that they are an EV certified dealer.
