Dear International customer,

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

International Motors, LLC\* has decided that a defect which relates to motor vehicle safety exists in certain 2023-2026 LT™ series trucks built 04/08/2022 thru 10/30/2025, 2023-2026 RH™ series trucks built 04/11/2022 thru 10/29/2025 with an International S13 engine (feature codes 0012BGT, 0012BGU, 0012GBV, 0012BGW, 0012BGX, 0012BHC), tractor air brakes (feature code 0004092) and without a Spring Brake Modulator Valve (feature code 0004WDT).

**REASON FOR THIS RECALL**

Under certain conditions, the auto neutral function of the transmission may not recognize the application of the park brake.

**RISK TO MOTOR VEHICLE SAFETY**

If the transmission does not recognize that the park brake is applied, it can remain in gear. If the transmission remains in gear while the service brakes are not applied, the engine's Initial Vehicle Movement Mode (IVM) may begin to apply torque to the driveline, possibly causing the vehicle to move unexpectedly, increasing the risk of a crash or injury.

**DEFECT REMEDY**

The remedy will involve replacing the quick release valve on each rear axle with a new quick release valve. The repair will be performed free of charge and take approximately an hour to complete.
