

IMPORTANT SAFETY RECALL

OWNER NOTIFICATION NOTIFICACIÓN PROPIETARIO

NHTSA Recall 25V-821

This notice applies to your vehicle, [VIN].

January 23, 2026

Dear Nissan Armada Owner:

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act. Nissan has decided that certain 2025 Model Year Nissan Armada vehicles fail to conform to Federal Motor Vehicle Safety Standard (FMVSS) number 111, "Rear Visibility". Our records indicate that you own or lease the Nissan vehicle subject to this recall as identified by the VIN above and inside of this notice.

Reason for Recall

Motivo del Retiro

Under certain circumstances at vehicle start-up, the In Vehicle Infotainment (IVI) System may enter a power-saving mode, causing the IVI display to stop functioning and resulting in a blank screen. This condition can also cause the rear-view image to be blank even when the vehicle is shifted into reverse. This condition may not comply with FMVSS 111. The potential for loss of rear-view image during a backing event may lead to the increased risk of a crash or injury to a person behind the vehicle.

What Nissan Will Do

Qué Hará Nissan

Your Nissan dealer will reprogram the IVI System with updated software via Universal Serial Bus (USB). This service, which is conducted at no charge to you for parts and labor, could take up to one (1.0) hour to complete. However, your Nissan dealer may require your vehicle for a longer period of time based upon their work schedule.

For certain Armada vehicles equipped with over-the-air (OTA) update capability, Nissan is working to offer the reprogramming through an OTA update in the coming months. Once it is available, if you have not yet received the updated software at the Nissan dealer, Nissan will send an in-vehicle message prompting you to accept the OTA update. The OTA reprogram will be downloaded free of charge and will install in the background on your vehicle. For awareness, this OTA software update should take one half (0.5) hour to complete but may take longer based on the strength of your local cellular signal.

What You Should Do Qué Debes Hacer

Please contact your local Nissan dealer in order to arrange an appointment to have your free vehicle remedy performed as soon as possible. Please bring this notice with you when you keep your service appointment.

For Armada vehicles with over-the-air (OTA) update capability which have not previously been remedied through a dealer visit when the OTA update becomes available, owners should follow the in-vehicle messaging to accept the update as soon as you receive the notification via the IVI touch screen display. Once accepted, the software will install itself over a half-hour time period in the background on your vehicle.

Comuníquese con su concesionario Nissan local para concertar una cita para realizar la reparación gratuita de su vehículo lo antes posible. Por favor, traiga este aviso con usted cuando asista a su cita de servicio.

Para los vehículos Armada con capacidad de actualización inalámbrica (OTA) que no hayan sido reparados previamente en un concesionario: una vez que la actualización OTA esté disponible, los propietarios deberán seguir las instrucciones en el vehículo para aceptar la actualización tan pronto como reciban la notificación en la pantalla táctil (IVI). Una vez aceptada, el software se instalará automáticamente en segundo plano en un periodo aproximado de media hora.
