Dear Husqvarna motorcycle customer,

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

Husqvarna Mobility North America, Inc has decided that a defect which relates to motor vehicle safety exists with certain model motorcycles listed above pertaining to the engine control unit software.

An issue with the originally installed engine control unit software may cause the engine to stall at low rpms.

A loss of engine power increases the risk of a crash which could cause injury to the rider or others and/or damage to property.

To remedy this defect, dealers will install the updated engine control unit software on all affected motorcycles, free of charge.

Please contact your authorized Husqvarna motorcycles dealer (log onto [www.husqvarna-motorcycles.com](http://www.husqvarna-motorcycles.com) for a complete dealer listing) as soon as possible to arrange having the updated engine control unit software installed. It is suggested that you call your local authorized Husqvarna motorcycles dealer to make an appointment to have the recall repair performed. The procedure will take approximately 30 minutes. However, it may be necessary to leave your motorcycle with the dealer for a longer period of time depending on their work schedule and if they need to order replacement parts. Please present a copy of this letter along with your motorcycle to your local authorized Husqvarna motorcycles dealer.
