Volvo Cars USA LLC and Volvo Cars Canada LTD on behalf of the Volvo Car Corporation has decided to launch Recall R10298: EX90 Headlamp Software on all model year 2025 EX90 vehicles.

Volvo Car Investigations has determined that the Low Power Controller (LPC) could send a request to perform a reference run to the headlamps, causing the headlamp shutters to temporarily close over the low/high beams.

As a result, loss of headlight illumination will reduce nighttime visibility and increase the risk of a crash.

To remedy concerned vehicles, Volvo Cars will perform a software upgrade on all affected EX90 vehicles.

Volvo Cars centrally has not received any reports alleging injuries, fatalities, or crashes related to this condition.

A total of 2,061 U.S. and 193 Canadian vehicles are affected by this recall.
