Trailer Lights Inoperative VN(4)

RECALL INFORMATION

(November 2025)

Volvo Trucks has determined that certain VN(4) model vehicles may be equipped with a defective Trailer Body Input/Output Module (TBIOM). This defect could cause the module to have limited functionality, rendering the trailer lights inoperable and increasing the risk of a crash. If a trailer being towed experiences a loss of trailer lighting functions, vehicles around the trailer may not observe the trailer reducing speed, stopping, or changing lanes, which could lead to an increased risk of a crash.

Volvo Trucks has not received any complaints or reports of vehicle crashes because of this safety; therefore, Volvo considers this as a proactive measure to protect the public and Volvo's customers from the potential risk associated with this defect.

To correct this safety issue, the TBIOM must be replaced and the associated software reloaded.

VEHICLES AFFECTED

Certain 2025-2026 Volvo VN(4) model vehicles manufactured between October 14, 2024, and September 5, 2025.

VEHICLE QUANTITY

There are 2,549 vehicles affected by this recall (2,307 U.S., 242 Canada).

Parts

Order parts through normal process.

Part Number	Part description	Quantity
24482711	TBIOM	1

Repair Instructions

1. Secure Vehicle for service.
2. Follow Impact operation **3651-03-02-18 Trailer Body Information Module (TBIOM) Replace**.
3. Release the truck.
