### IMPORTANT SAFETY RECALL

NHTSA Recall Number: 25V099  
This notice applies to your vehicle: **Insert VIN**

April 4, 2025

Dear Kia Soul Vehicle Owner:

**Kia has identified a defect in your vehicle which relates to motor vehicle safety.**

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act. Kia America, Inc. has decided that a defect which relates to motor vehicle safety exists in certain 2021-2023 MY Soul vehicles equipped with 2.0-liter Multi-Point Injection (MPI) engines. The defect can result in a loss of drive power and/or fire, increasing the risk of crash and injury. Our records indicate that you own or lease one of the affected vehicles.

#### What Is The Problem?

The piston oil ring(s) in your vehicle may have been manufactured incorrectly by the supplier and may damage the surface of the engine cylinder wall. This may lead to increased oil consumption, resulting in abnormal noise from the engine and/or illumination of the oil pressure warning light . Continued operation in this condition may damage the engine and/or seizure can occur, resulting in loss of drive power. A fire may occur from engine oil leaking onto a hot exhaust component due to a hole in the engine block. Loss of drive power and/or fire increases the risk of crash and injury.

**Kia Will Inspect, Replace The Engine If Necessary, And Install A Piston-Ring Noise Sensing System (PNSS), Free Of Charge At No Cost To You.**

Kia dealers will inspect, and if necessary, replace the engine. Dealers will also install a Piston-ring Noise Sensing System (PNSS) software to provide an early warning light to the driver of potential damage to the engine. If the PNSS software subsequently sets a Diagnostic Trouble Code (DTC) P1327 - Piston Noise Detection, the engine will be replaced. This recall will be performed **free of charge at no cost to you**. The time required to perform the inspection and software update will be approximately one (1) to two (2) hours. If an engine replacement is necessary, the estimated time required is 8 hours or more. We recommend scheduling a service appointment to minimize your inconvenience.

#### What Should You Do?

- **WARNING:** You may experience abnormal noise from the engine, illumination of the oil pressure warning light  and/or loss of drive power.
