Under Floor Wiring

August 7, 2025

Dear <<NAME>>,

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act. Brinkley RV has decided that a defect, which relates to motor vehicle safety, exists in certain 2025 Brinkley RV Model Z recreational vehicles produced. This is to inform you that your vehicle may contain a defect that could affect the safety of a person

For Canadian residents: This notice is sent to you in accordance with the requirements of the Motor Vehicle Safety Act. This is to inform you that your vehicle may contain a defect that could affect the safety of a person.

WHAT IS THE DEFECT/NONCOMPLIANCE?

It has been decided that the vehicles in the recall population were assembled without the standard wire harnesses utilized by Brinkley RV. In place of the wiring harness, individual wires were ran in the recalled units. In certain circumstances, these individual wires may migrate below holding tanks, creating a pinch point between the tanks and underlying support members.

EVALUATION OF THE RISK TO THE VEHICLE AND OPERATOR(S) RELATED TO

THE RECALL:

Under certain conditions, if the wiring becomes loose, the wires may migrate under the holding tanks. If a tank is filled when a wire is located between the tank and a tank support, it can damage the wiring. This has the potential to cause a fire.
