### Details of the Recall

The instrument panel in your vehicle may have been built with an incorrect cross car beam. An incorrect cross car beam may compromise intended load distribution or energy management performance, which can increase the risk of injury in certain crashes.

FCA US LLC will repair your vehicle free of charge (parts and labor). To do this, your dealer will replace the instrument panel cross car beam. The estimated repair time is 5 hours. In addition, your dealer will require your vehicle for proper check-in, preparation, and check-out during your visit, which may require more time. Your time is important to us, so we recommend that you schedule a service appointment to minimize your inconvenience.
