

IMPORTANT! SAFETY RECALL 93EV – High-Voltage (HV) Battery Modules

If this email is not displayed correctly, please click [here](#).

Our records indicate your vehicle, VIN ending in: 001288, needs high-voltage battery repair under Safety Recall 93EV – High-Voltage (HV) Battery Modules (NHTSA 25V836).

This recall must be completed by a Volkswagen High-Voltage Battery Repair Certified dealer. [Click here](#) To find the closest battery repair dealer & schedule this work.

The recall work will take up to one day to complete and will be performed for you free of charge.

Precautions

Until the recall work has been completed, owners should take the following precautions:

- Set the vehicle's high-voltage battery system to an 80% state of charge limitation.
- Avoid using Level 3 DC chargers.
- Out of an abundance of caution, park the vehicle outdoors immediately after charging and do not leave the vehicle charging indoors overnight.

As a reminder, the vehicle owner's manual contains important information about vehicle charging. We encourage anyone who drives the vehicle to review the owner's manual to become familiar with this important information.

We apologize for any inconvenience this may cause; however, we are taking this action to help ensure your safety and continued satisfaction with your vehicle.
