**Title**

BMW Safety Recall 25V-700: EGR Cooler

**Text**

The engine's Exhaust Gas Recirculation (EGR) Cooler could develop an internal leak allowing the cooling fluid to mix with typical diesel engine soot deposits. With high temperatures normally present in the EGR module, this might result in smoldering particles that may contact the engine intake manifold, and result in small holes due to melting, increasing the risk of a fire.

If you notice an unpleasant odor, i.e., an odor of exhaust gas and you hear an unusual noise from the engine compartment, your vehicle may be experiencing this issue. You may see smoke from the engine. If this occurs, carefully move away from traffic and pull over to a safe location as soon as possible. All occupants should carefully exit the vehicle and move to a safe location away from traffic. Do not continue to drive the vehicle. Contact BMW Roadside Assistance at 1-800-332-4269 immediately to have your vehicle brought to the nearest authorized BMW center.

Contact an authorized BMW center immediately to get your vehicle repaired for FREE. Dealer locator: [bmwusa.com/dealer](http://bmwusa.com/dealer).

Advise all drivers of this important information.
