

## Hyundai Recall 277 (NHTSA Recall # 25V-235)

### Infotainment Messaging for Over-The-Air Update

Once the over-the-air (OTA) software has been downloaded and the background update is finished, the software update will be available to install.

- Pop-up Screen Text after Engine is turned off:

The update will continue even when the vehicle is turned off.

- Total Update Time: 9 min

Update Details

[Recall] Braking & Acceleration Performance: Important Update for Hyundai Recall 277

Software Version: 25.4.1 (subject to change)

This important update corrects a condition in the vehicle's Integrated Electronic Brake (IEB) and Vehicle Control Unit (VCU) systems. The IEB software may cause reduced braking performance when the Left-Foot Braking (LFB) feature is activated. Separately, the VCU software may trigger a momentary continued acceleration during release of the accelerator pedal if the vehicle's N e-Shift feature is engaged. Reduced braking performance or momentary continued acceleration increases the risk of a crash.

- Previous [selectable]
- Start Update [selectable]
- Later [selectable]

- 1<sup>st</sup> Screen after Start Update/Update Now selection:

The update will start soon. (58 sec)

The vehicle must be turned off, and the following conditions must be maintained to proceed with the update.

- ✓ Gear: in P (Park)
- ✓ Exterior Lights: Off
- ✓ Parking Brake: On
- ✓ Hood: Closed

The update will continue to run in the background even if the screen is turned off. When the update is complete, the results will be sent to your MyHyundai with Bluelink App.

- Update Now [selectable]
- Later [selectable]

- 2<sup>nd</sup> Screen after Start Update/Update Now selection:

Updating...

Vehicle cannot be driven during an update.

The screen will automatically turn off to save the battery.

- What's New & QR Code Pop-Up Screen text after the update:
