Hi Steve, there is an urgent safety recall for your Volvo XC90. To address it, you need to install a free software update that is available now for your vehicle.

To do so, simply click the gear icon in the bottom right corner of your car's center screen -> click "system" -> click "software update" -> and then "install"

■ We urge you not to drive your car until it has been updated to software version 3.6.4 or later. If you need to have your software updated at your Volvo Retailer do not drive in B-mode (plug-in hybrid cars) or one pedal drive (fully electric cars) until your car has been updated to software version 3.6.4 or later.

Installation of this update is free of charge at your Volvo Retailer. Our Customer Care team is here to help you at [1-800-550-5658](tel:1-800-550-5658)
