Defect / Noncompliance Description

Description of the defect or noncompliance:

Extended use and certain wear conditions may cause a screw in one side of the car seat's hub assembly to loosen, allowing for a partial detachment of the carry handle.

FMVSS1:

FMVSS2:

Description of the safety risk, including crash, fire, death, injury:

If this condition occurs, the carry handle may detach on one side, creating a fall hazard and potential risk of injury to the child.

Description of the cause:

Extended use and wear conditions

Identification of any warning that can occur:

The condition is expected to be readily detectable by caregivers during normal use, as the handle may visibly separate and/or feel loose before any potential detachment.

Chronology

On 1 August 2026, Britax received a consumer complaint reporting a handle hub mount detachment and a related minor injury. Britax promptly initiated a retrospective review to more comprehensively assess field and warranty reports across the product range. Across the more than ten-year review period, the investigation identified 217 reports alleging incidents involving handle detachment and 312 additional reports alleging other handle performance concerns, such as handle looseness or wobble, which includes three additional reports of minor injury since 2016. Britax has not identified any reports of serious injury or fatality associated with this matter. In light of these findings, and out of an abundance of caution, Britax is undertaking a voluntary recall.

Description of Remedy

Remedy Type: Repair

Consumer Advisories: ☐ Do Not Drive ☐ Park Outside

Description of remedy program:

Britax will remedy this defect free of charge by adding two retention clips to the hub mount assembly of the car seat. No tools are required, and no other parts on the car seat will be removed or replaced. The retention clips will be provided to consumers as part of a remedy kit, along with detailed, illustrated step-by-step installation instructions.

How remedy component differs from recalled component:

The relevant difference will be that the hub mount assembly will be more securely connected via an external bracketing component and therefore extended use and certain wear conditions will no longer cause a partial detachment.

Identify how/when recall condition was corrected in production:

Affected products are no longer in production.

Reimbursement Plan

Description of reimbursement program:
Britax will reimburse any consumers who incurred out of pocket costs to repair the recall condition during the period covered by the reimbursement plan.

Period of reimbursement:
The reimbursement program includes qualified costs incurred through September 24, 2026.

Costs to be reimbursed:
Qualified costs incurred to repair recalled products for the condition giving rise to the recall.
