Part 573 Safety Recall Report

26V455

Manufacturer Name: Nissan North America, Inc.

Submission Date: Jul 24, 2026

NHTSA Recall No.: 26V455

Manufacturer Recall No.: R26B1/2, P6A13/4

Manufacturer Information

Population

Manufacturer Name: Nissan North America, Inc.

Address: P. O. BOX 685001
Franklin TN, 37068-5009

Total number of potentially involved: 168,149

Estimated percentage with defect: 100%

Vehicle Information

Vehicle 1: 2020-2024 NISSAN ARMADA

Product Category: Light Vehicles

Product Type: Multipurpose Passenger Vehicle

Fuel / Propulsion: Spark Ignition Fuel

Production Dates: Feb 22, 2019 - Sep 05, 2024

Number of potentially involved: 24,860

Descriptive Information:

Based on Nissan production records, the issue is specific to certain Model Year 2020-2026 Nissan Armada, certain Model Year 2011-2013 INFINITI QX56, and certain Model Year 2014-2027 INFINITI QX80 vehicles equipped with 22" wheels that may have received an inaccurate Certification Label and were produced during the specified vehicle production period.

No other Nissan or INFINITI vehicles are affected.

Vehicle 2: 2014-2024 INFINITI QX80

Product Category: Light Vehicles

Product Type: Multipurpose Passenger Vehicle

Fuel / Propulsion: Spark Ignition Fuel

Production Dates: Nov 30, 2012 - Mar 11, 2024

Number of potentially involved: 90,132

Descriptive Information:

Based on Nissan production records, the issue is specific to certain Model Year 2020-2026 Nissan Armada, certain Model Year 2011-2013 INFINITI QX56, and certain Model Year 2014-2027 INFINITI

Part 573 Safety Recall Report

QX80 vehicles equipped with 22" wheels that may have received an inaccurate Certification Label and were produced during the specified vehicle production period.

No other Nissan or INFINITI vehicles are affected.

Vehicle 3: 2025-2026 INFINITI QX80

Product Category: Light Vehicles

Product Type: Multipurpose Passenger Vehicle

Fuel / Propulsion: Spark Ignition Fuel

Production Dates: Oct 23, 2023 - Mar 26, 2026

Number of potentially involved: 24,162

Descriptive Information:

Based on Nissan production records, the issue is specific to certain Model Year 2020-2026 Nissan Armada, certain Model Year 2011-2013 INFINITI QX56, and certain Model Year 2014-2027 INFINITI QX80 vehicles equipped with 22" wheels that may have received an inaccurate Certification Label and were produced during the specified vehicle production period.

No other Nissan or INFINITI vehicles are affected.

Vehicle 4: 2025-2026 NISSAN ARMADA

Product Category: Light Vehicles

Product Type: Multipurpose Passenger Vehicle

Fuel / Propulsion: Spark Ignition Fuel

Production Dates: Mar 11, 2024 - Mar 23, 2026

Number of potentially involved: 4,718

Descriptive Information:

Based on Nissan production records, the issue is specific to certain Model Year 2020-2026 Nissan Armada, certain Model Year 2011-2013 INFINITI QX56, and certain Model Year 2014-2027 INFINITI QX80 vehicles equipped with 22" wheels that may have received an inaccurate Certification Label and were produced during the specified vehicle production period.

No other Nissan or INFINITI vehicles are affected.

Vehicle 5: 2011-2013 INFINITI QX56

Product Category: Light Vehicles

Product Type: Multipurpose Passenger Vehicle

Part 573 Safety Recall Report

26V455

Fuel / Propulsion: Spark Ignition Fuel

Production Dates: Nov 09, 2009 - Jun 12, 2013

Number of potentially involved: 24,277

Descriptive Information:

Based on Nissan production records, the issue is specific to certain Model Year 2020-2026 Nissan Armada, certain Model Year 2011-2013 INFINITI QX56, and certain Model Year 2014-2027 INFINITI QX80 vehicles equipped with 22" wheels that may have received an inaccurate Certification Label and were produced during the specified vehicle production period.

No other Nissan or INFINITI vehicles are affected.

Defect / Noncompliance Description

Description of the defect or noncompliance:

On certain affected Model Year 2020-2026 Nissan Armada, certain Model Year 2011-2013 INFINITI QX56, and certain Model Year 2014-2027 INFINITI QX80 vehicles equipped with 22" wheels, the Certification Label may have been printed with the incorrect Gross Axle Weight Rating (GAWR) values. As such, these vehicles fail to comply with the requirements of 49 CFR Part 567, "Certification" and S4.3.3. of Federal Motor Vehicle Safety Standard 110.

FMVSS1: 110 - Tire selection and rims

FMVSS2:

Description of the safety risk, including crash, fire, death, injury:

If the weight limits are incorrect, the vehicle could be overloaded, increasing the risk of a crash.

Description of the cause:

Identification of any warning that can occur:

There is no warning for the customer.

Chronology

In May 2025, During the development phase of a new vehicle model, Nissan identified a discrepancy between the regulatory language specified in FMVSS 110 and the corresponding NHTSA Test Procedure. Nissan initiated an investigation into this potential concern.

During the Summer of 2025, an initial review indicated that Nissan's engineering standards defined requirements based on the original regulatory statement. Due to ambiguity in the standard, the Gross Axle Weight Rating (GAWR) value was calculated based on only the maximum tire pressure as opposed to both the maximum tire pressure and the manufacturer recommended tire pressure listed on the placard.

By August 2025, Nissan initiated internal discussions regarding the interpretation of the standard (FMVSS 110) and how it relates to the calculation of the GAWR.

In Early 2026, Nissan initiated a comprehensive regulatory assessment to evaluate the potential risk of the calculated GAWR. Additionally, a production countermeasure consisting of a revision to the GAWR values printed on the vehicle certification was implemented and a formal label correction notification was issued to the plant. On March 16, 2026, the revised label countermeasure was successfully adopted into current vehicle production.

April 2026 through May 2026, Nissan initiated a horizontal evaluation to identify the scope of potentially affected vehicles.

In June 2026, Nissan conducted a remedy feasibility study to evaluate the performance, adhesion, and long-term quality of utilizing an overlay label as a field remedy. Additionally, by the end of June, Nissan concluded the horizontal confirmation audit and confirmed the scope of potentially affected vehicles, including other vehicle model years and export markets.

Part 573 Safety Recall Report

26V455

July 8, 2026 - Nissan decided to conduct a voluntary recall campaign to remedy the potentially affected vehicles in the U.S. market.

Nissan is not aware of any warranty claims, accident or injuries related to the subject condition.

Description of Remedy

Remedy Type: Mail Information/Labels, Repair

Consumer Advisories: ☐ Do Not Drive ☐ Park Outside

Description of remedy program:

On July 16, 2026, Nissan issued a Stop Sale notification to dealers. Beginning on July 21, 2026, through July 22, 2026, Nissan Dealers and INFINITI Retailers were issued remedy instructions and have been supplied with a limited volume of VIN-specific Certification Labels displaying the proper Gross Axle Weight Rating (GAWR) value to address affected inventory vehicles. On August 21, 2026, Nissan will mail interim notification letters to registered owners of potentially affected vehicles informing them of the issue and the correct GAWR value for their vehicle. Once remedy parts are available, Nissan will mail non-VIN specific labels with the corrected GAWR directly to owners with step-by-step instructions for self-application. For owners who prefer not to apply the label themselves, a Nissan Dealer or INFINITI Retailer will be able to apply the label free of charge for both parts and labor and estimated to take less than thirty (30) minutes to complete.

How remedy component differs from recalled component:
