## **New Safety Recall Advanced Communication – 03D**

FCA US LLC (FCA US) has announced a safety recall on certain 2025 and 2026 model year (DT) Ram 1500 Pickup, (DJ) Ram 2500 Pickup, (D2) Ram 3500 Pickup, (DD) Ram 3500 Cab Chassis, (DP) Ram 4500/5500 Cab Chassis, 2024 through 2026 model year (KM) Jeep Wagoneer S and 2026 model year (KM) Jeep Cherokee vehicles equipped with a trailer tow package.

### **REASON FOR THIS SAFETY RECALL**

Some Ram trucks may experience a loss of trailer lighting and/or trailer brakes, and some Jeep vehicles may experience a loss of trailer lighting. The trailer turn signal will not flash when the vehicle turn signal lever is actuated and the trailer stop lamps will not be activated upon application of the vehicle service brakes. In addition, on Ram trucks, if equipped, the trailer brakes will not function. Trailer lighting that is not illuminated may result in an approaching vehicle being unaware of the change of direction or speed of the vehicle and trailer which may cause a vehicle crash without prior warning. The loss of trailer brakes can also cause a vehicle crash without a prior warning.

### **SERVICE ACTION**

FCA US LLC will conduct a voluntary safety recall to replace the trailer tow module. The remedy for this condition is not currently available. Dealers will be notified of the launch of this safety recall by way of established communication methods. This recall is estimated to launch in 1st Quarter of 2026.

We ask that you please take the time to ensure that your personnel are aware of this communication and are prepared to execute a customer friendly process for inquiries regarding involved vehicles.
