Re: ***WRD-26 Fuel Filler Cap Gasket Updates- Owner Notification and Campaign bulletin availability***

We are happy to provide some updated information regarding the WRD-26 Fuel Filler Cap Gasket Recall.

- Owner notification letters will be sent today, 3/25. All affected models with the WRD-26 recall in an “Open-Remedy not yet available” status have been updated to an “Open” status. As a result, retailers can complete the WRD-26 recall on all open vehicles. Please use the Vehicle Coverage Inquiry function on subarunet.com to confirm coverage prior to repair.
- The WRD-26 campaign bulletin will be available on STIS by the end of the day today. Please access the WRD-26 recall bulletin for the most up to date recall information, including repair flow chart, procedures, and claim information.
- The WRD-26 kit (part SOA3212026X) is available to be ordered by retailers in Parts Eye/Prime. While we continue to receive a steady inventory, there are PRIME max levels set for each retailer. Please refer to Parts Eye to understand your PRIME max levels.
