URGENT - DISTRIBUTE IMMEDIATELY

Date: February 26, 2026

Subject: Upcoming Safety Recall N252537580

Rear Suspension Toe Link May Break

Models: 2012-2013 Buick Regal

General Motors has notified the National Highway Traffic Safety Administration (NHTSA) about an upcoming safety recall. The GM recall number is N252537580.

It is a violation of federal law for a dealer to deliver a new motor vehicle or any new or used item of motor vehicle equipment (including a tire) covered by this notification until the defect is remedied.

General Motors has decided that a defect which relates to motor vehicle safety exists in certain 2012 – 2013 model year Buick Regal Turbo and GS trim line vehicles that were ever registered in Connecticut, Delaware, the District of Columbia, Illinois, Indiana, Iowa, Kentucky, Maine, Maryland, Massachusetts, Michigan, Minnesota, Missouri, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Vermont, Virginia, West Virginia, or Wisconsin (collectively, “Corrosion States”). These vehicles may have rear toe links that received improper electrocoating (e-coat) corrosion protection, which could cause the link to be more susceptible to long-term corrosion. Corrosion may eventually cause the toe link to thin and ultimately to fracture. This is an expansion of recalls 21V633 and 21V00F. A rear toe link fracture may reduce the ability to control the vehicle, increasing the risk of a crash.

Parts are not currently available, but when parts are available, dealers will replace rear suspension toe links and adjuster fasteners.

We do not have a VIN list of affected vehicles at this time, but we are working to obtain the affected VINs as soon as possible. Once that happens, the Investigate Vehicle History (IVH) screen in the Global Warranty Management (GWM) system will be updated. This action will be taken to assist dealers with determining which vehicles are involved so they can properly respond to customer inquiries.
