REASON FOR THIS SAFETY RECALL

In some of the affected vehicles, the EGR valve fails, causing weak acceleration, engine vibration, a no-start condition, or a loss of motive power (likely at low speeds of 15 mph or below). A check engine light may illuminate. A loss of motive power increases the risk of a crash.

SERVICE ACTION

DO NOT DEMONSTRATE OR DELIVER any new in-stock vehicles involved in this safety recall. For new vehicle storage guidelines, refer to EFC13033, Storage Guidelines for New Vehicles.

A complete Dealer Bulletin including technical instructions will be provided to dealers the September 18, 2026 when a remedy is available to support this safety recall.

IMPORTANT: Dealers should open a Repair Order (RO) only when a full dealer bulletin is published. Opening an RO against an Awareness or Advance Notice will result in warranty rejections against a recall.

OWNER NOTIFICATION

Owners of record will be notified via first-class mail within sixty days, which may occur before remedy availability including repair instructions have been provided to dealers.

PLEASE NOTE:

Federal law requires dealers to complete this recall service before a new vehicle is delivered to the buyer or lessee. Violation of this requirement by a dealer could result in a civil penalty of up to \$27,168 per vehicle. Correct all vehicles in your new vehicle inventory prior to delivery.

DEALER-OPERATED RENTAL VEHICLES

The Fixing America's Surface Transportation (FAST) Act law effective June 2016 prohibits a rental company from selling, renting or leasing vehicles subject to a safety recall. Please consult your legal counsel for legal advice.
