RE: IMPORTANT SAFETY NOTIFICATION –

To: Dealers

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

The Aluminum Trailer Company (ATC) has decided that a defect, which relates to motor vehicle safety, exists in certain 2023-2025 PL700 and 2024-2026 PL750 recreational vehicles. A list of vin numbers will be uploaded to the dealer portal for your reference.

ATC has determined that under the right conditions with the generator exhaust being directly under the bedroom slide out fumes could enter the RV bedroom, resulting in Carbon Monoxide intrusion. Exhaust fumes inside the cabin increase the risk of injury or death from carbon monoxide poisoning. Safety of all past and present ATC trailers is our top priority.

Owners will be notified by mail about the recall. ATC will supply all parts and instructions for rerouting the exhaust rearward and install an additional carbon monoxide detector in the bedroom slide out. Time estimated for the fix is 2.5 hours. ATC will reimburse any customer providing sufficient documentation who incurred costs to repair the defect before our notification was sent.

Please be reminded that it is a violation of Federal law for you to sell or lease the trailers covered by this notification until this recall has been performed on these trailers. Substantial civil penalties apply to violations of this law.

Your assistance with this recall is appreciated. Should you have any questions or concerns, please contact Customer Support at The Aluminum Trailer Company by mail, P.O. Box 396 Nappanee, IN 46550; by phone (877) 441-2440, or electronic mail [customersupport@atctrailers.com](mailto:customersupport@atctrailers.com).

Sincerely,

The Aluminum Trailer Company
