

# SAFETY RECALL NOTICE

---

April 14, 2026

## Re: Potential Fatigue Failure of Front Brake Caliper Support - Loss of Front Braking

Dear BRP Dealer / Distributor,

This notice is sent to you in accordance with the requirements of the *Motor Vehicle Safety Act* (Canada), the National Traffic and Motor Vehicle Safety Act (United States) and other applicable laws. BRP has decided that a defect, which relates to motor vehicle safety, exists on certain vehicles and is conducting a safety recall.

### What is the potential problem?

A fatigue failure of the front brake caliper support may occur after multiple hard or emergency braking. If the support fails, front braking will be lost and it will increase the risk of a crash, causing injury or even death.

### Which models are involved?

All MY25 and MY26 Can-Am Origin vehicles

### What is the solution?

- The repair is to install a Caliper Support Reinforcement Kit on the front brake caliper support.
- Parts will gradually be available starting the week of May 18 in North America and week May 25 for other regions.
- The repair will be free of charge (parts and labor) for the customer.
- It will take less than an hour to complete.

### What should you do?

- Read the Safety Campaign Bulletin 2026-1.
- Refer to Campaign Monitoring to validate involved vehicle serial numbers.
- Do not deliver any involved vehicle before performing the safety recall.
- Contact all of your customers included in the campaign and inform them about:
  - The safety recall
  - The instructions below for the use of their vehicle:

*This is a fatigue-related failure caused by repeated hard and emergency braking. From the factory, your vehicle was equipped with dual purpose tires. You may have installed other tires, including on-road tires. Using on-road tires accelerates the fatigue. In this case, repair is strongly recommended before extensive and/or dynamic rides.*

**What will BRP do for customers?**

- Within direct markets: BRP will send a safety recall letter to all known registered owners.
- Within distributor markets: BRP is notifying its distributors. The distributors are then responsible to deploy the safety recalls in their respective markets and must follow all legal requirements.
- Information for customers will be posted on the Can-Am On-road public websites.

BRP prides itself on being an industry leader and providing you, as well as our customers, with the very best information so we can collectively preserve the reputation of our products.

We apologize for any inconvenience this may have caused you or your customers.

Sincerely,

***BRP Customer Service Department***

**If you have questions about this notice, please communicate with us:**

- By submitting a Technical Support Request/Report incident in **BOSSWeb**.  
A service representative will communicate with you.
