

## **New Safety Recall Advanced Communication – 29D**

FCA US LLC (FCA US) has announced a safety recall on certain 2026 Model Year (KM) Jeep® Cherokee vehicles.

### **REASON FOR THIS SAFETY RECALL**

Some 2026 Model Year Jeep Cherokee vehicles may have been built with suspect Brake System Control Modules (BSCM) resulting in incorrectly functioning Anti-Lock Brake System (ABS) / Electronic Stability Control (ESC). Incorrectly functioning ABS / ESC can result in compromised vehicle control, which can result in a crash without prior warning.

### **SERVICE ACTION**

FCA US will conduct a voluntary safety recall on all affected vehicles to recalibrate the BSCM software with an updated version. The remedy for this condition is not currently available. Dealers will be notified of the launch of this safety recall by way of established communication methods. This recall is estimated to launch in 2nd Quarter of 2026.

We ask that you please take the time to ensure that your personnel are aware of this communication and are prepared to execute a customer friendly process for inquiries regarding involved vehicles.
