## **New Safety Recall Advanced Communication – 01D**

FCA US LLC (FCA US) has announced a safety recall on certain 2022 through 2026 Model Year (WL) Jeep® Grand Cherokee vehicles.

### **REASON FOR THIS SAFETY RECALL**

Some of the above vehicles may have been built with Occupant Restraint Controller (ORC) modules containing software which may cause transient door airbag pressure sensor faults to remain active for the lifetime of the sensor, which may result in delayed deployment of the SAB. A delayed deployment of the SAB may reduce front seat occupant protection in the event of certain types of crashes, potentially resulting in an increased risk of injury to motor vehicle occupants.

The condition described above does not comply with Federal Motor Vehicle Safety Standard (FMVSS) No. FMVSS 571.214 Side Impact Protection which requires Side Air Bag (SAB) deployment to satisfy injury criteria with multiple occupant sizes in various crash modes.

### **SERVICE ACTION**

FCA US will conduct a voluntary safety recall to reprogram the ORC. The remedy for this condition is not currently available. Dealers will be notified of the launch of this safety recall by way of established communication methods. This recall is estimated to launch in 2nd Quarter of 2026.

We ask that you please take the time to ensure that your personnel are aware of this communication and are prepared to execute a customer friendly process for inquiries regarding involved vehicles.
