Re: **EXPANSION**-Stop Sale/Safety Recall: 2016-2026 Multi-Model Seat Weight Sensor Failure

On May 21, 2026, American Honda notified NHTSA of a **stop sale** and **safety recall** for approximately 94,000 units of model year 2016-2022 Accord, 2017-2022 Accord Hybrid, 2016-2022 Civic, 2017-18 & 2021 Civic Type R, 2017-2022 CR-V, 2020-2022 CR-V Hybrid, 2018-2020 Fit, 2019-2021 HR-V, 2019-2022 Insight, 2018-2026 Odyssey, 2019-2021 Passport, 2017-2022 Pilot, and 2017-2021, 2023 & 2025 Ridgeline. Affected vehicles may be equipped with seat weight sensors not built to proper specifications. Improperly built sensors could lead to cracking and/or a short circuit of the sensor, resulting in the illumination of the SRS warning light and the passenger airbag indicator remaining OFF. In certain collisions, these seat weight sensors may cause improper deployment of the front passenger airbag, increasing the risk of injury. **Refer to your eResponsibility report or perform an iN VIN status inquiry to determine which units in your inventory are affected.**

### **REPAIR**

Replace the seat weight sensors.

### **PARTS**

Parts will be available at launch. Refer to PIB for details regarding parts availability and ordering.

### **TOOLS**

There are no special tools required for this recall.
