TEKO INC.

IMPORTANT SAFETY RECALL NOTICE

NHTSA Recall No.: 26V420

Date: August 3, 2026

To: Authorized Teko EV Dealers

Re: Safety Recall 26V420 – FMVSS No. 141 Acoustic Vehicle Alerting System

Dear Authorized Teko EV Dealer:

Teko EV Corporation is providing this notice in connection with NHTSA Recall No. 26V420. Teko EV has determined that certain Teko EV low-speed vehicles ("LSVs") may fail to conform to Federal Motor Vehicle Safety Standard ("FMVSS") No. 141, Minimum Sound Requirements for Hybrid and Electric Vehicles, because the LSVs may have been delivered for sale without an installed Acoustic Vehicle Alerting System ("AVAS"). This notice provides important information regarding the affected LSVs, the nature of the noncompliance, the remedy, and the actions requested of authorized Teko EV dealers.

This recall applies only to certain Teko EV LSVs identified by Teko EV as affected. These LSVs have a 17-digit VIN beginning with 71N.

I. Affected Low-Speed Vehicles

This recall applies only to LSVs identified by Teko EV as affected. The affected LSV population includes certain LSVs within the following model and model-year ranges:

2026-2026 TEKO Triumph

2026-2026 TEKO TurboLite

2026-2026 TEKO Trophy Plus

2026-2026 TEKO Trophy

2026-2026 TEKO Turbo

II. Safety Issue

The affected LSVs may have been delivered without an installed AVAS. As a result, they may not produce the required exterior sound during applicable low-speed operation. Without the required sound, pedestrians, cyclists, and other road users may have a reduced ability to detect the LSV, which may increase the risk of a crash or injury during low-speed operation.

III. Retail Delivery Process

Before retail delivery, please confirm by VIN whether an LSV is subject to this recall. Under federal law, an affected new LSV may not be delivered under a sale or lease until the AVAS remedy has been completed. Once the remedy has been completed and documented, the LSV may proceed through the normal delivery process.

IV. Dealer Action Steps for Affected Low-Speed Vehicles

To support an orderly recall process, each authorized Teko EV dealer is requested to complete the following steps. This recall applies only to LSVs identified by VIN as affected and does not apply to Teko EV golf carts.

1. Please review all LSV inventory and confirm by VIN whether any LSVs are included in this recall.
2. For each affected new LSV, please complete the AVAS remedy before sale, lease, or retail delivery. Once remedy kits and service instructions are available, please also assist affected owners as directed by Teko EV.
3. Please maintain a record of each completed remedy, including the VIN, completion date, dealer name and location, and the individual who completed or verified the work.
4. When communicating with customers, please use the recall notices, service instructions, and customer materials provided or approved by Teko EV.

V. Remedy

Teko EV will provide an AVAS remedy kit for each affected LSV. The remedy kit includes the exterior sound generator/speaker and associated installation components. The installation procedure is expected to require minimal time. Once the remedy kit is installed, the LSV will conform to the sound requirements of FMVSS No. 141.

VI. Estimated Remedy Schedule

Teko EV originally expected to begin shipping remedy kits to authorized dealers on or about August 15, 2026. If your dealership has not received a remedy kit as of August 15, 2026, please contact us via recall@tekoev.com. Owner notification is expected to begin on or about August 17, 2026. Additional service, parts, and claim instructions will be provided separately as they become available.

VII. Contact Information

For questions regarding this recall, please contact:

Teko EV Recall Support

Email: recall@tekoev.com

Phone: 903-307-7778

Address: 8131 Merritt Rd, Rowlett, TX 75089

Teko EV appreciates your prompt cooperation in supporting this recall and ensuring that affected vehicles are remedied in accordance with applicable requirements.

Sincerely,

Teko Inc.
