

New Safety Recall Advanced Communication – 62D

FCA US LLC (FCA US) has announced a safety recall on certain 2026 model year (DT) Ram 1500 Pickup trucks.

REASON FOR THIS SAFETY RECALL

Some of the above vehicles with premium headlamp assemblies which may have been produced with internal harness connector terminals that were not fully connected, may turn off the Parking Lamps and/or Daytime Running Lamps (DRLs). Parking lamps and DRLs which turn off or flicker when not intended may reduce the conspicuity of the vehicle which may cause a vehicle crash without prior warning.

The condition described above does not comply with Federal Motor Vehicle Safety Standard (FMVSS) No. 571.108 S6.1.1 referencing Table I requires subject vehicles to be equipped with DRLs and Parking Lamps that are steady burning when activated. Suspect vehicles may illuminate the DRLs and Parking Lamps intermittently.

SERVICE ACTION

FCA US will conduct a voluntary safety recall on all affected vehicles to inspect, and if necessary, replace the headlamp assembly. The remedy for this condition is not currently available. Dealers will be notified of the launch of this safety recall by way of established communication methods. This recall is estimated to launch in 3rd Quarter of 2026.

We ask that you please take the time to ensure that your personnel are aware of this communication and are prepared to execute a customer friendly process for inquiries regarding involved vehicles.
