Subject: **BMW Recall 26V-422: Integrated Brake System**

BMW AG is conducting a Voluntary Safety Recall (effective July 6, 2026) on certain Model Year 2023 - 2025 BMW vehicles that were produced between August 3, 2022, and October 16, 2024.

This Recall is on select vehicles to determine if the remedy performed in Recall 24V-104 and Recall 24V-739 was carried out in accordance with the necessary specifications.

The Recall Notice and FAQ have been attached for further information.

The bulletin will be updated when additional information becomes available.

SAFETY RECALL NOTICE

To: All Center Operators, Sales Managers, Service Managers, Parts Managers and Warranty Processors

RE: Recall 26V-422: Integrated Brake System – B34 01 26

BMW AG is conducting a Voluntary Safety Recall (effective July 6, 2026) on certain Model Year 2023 - 2025 BMW vehicles that were produced between August 3, 2022, and October 16, 2024.

This Recall is on select vehicles to determine if the remedy performed in Recall 24V-104 and Recall 24V-739 was carried out in accordance with the necessary specifications.

Please be reminded that it is a violation of federal law (The Safety Act) for you to sell, lease or deliver any new motor vehicle covered by this notification until the recall repair has been performed. This means that Centers may not legally deliver new motor vehicles to consumers until they are fixed or use/sell replacement equipment/parts subject to this recall. Note also that substantial civil penalties apply to violations of the Safety Act.

Also, you should not sell, lease or deliver any Certified Pre-Owned or used vehicles subject to a safety recall until the repair is completed.

Please follow any special instructions that we provide to you for the return or disposition of recall parts.

We appreciate all your assistance with this Recall.

We appreciate all your assistance with this Recall.

**Safety Recall
26V-422
Integrated Brake (IB)
Model Year 2023-2025
MINI 2 Door, Countryman
06/25/2026**

Q1. Which BMW Group models in the US are potentially affected by this Safety Recall?

Certain Model Year 2023-2025 MINI 2 Door and Countryman models in the US are potentially affected.

Q1a. This sounds familiar. Was there an earlier Safety Recall on this topic?

Yes.

Q1b. I had the Integrated Brake (IB) module replaced on my vehicle as part of the earlier Safety Recall. Is my vehicle potentially affected again?

Yes, your vehicle is potentially affected again. We are reaching out to a small number of owners to have their vehicles checked.

Q2. What is the specific (original, 2024) issue?

The Integrated Brake (IB) module may not function according to specifications. If this happens, a warning lamp and message will be displayed in the instrument cluster. There will be a reduction in power assist braking, which could lead to an extended stopping distance and increase the risk of a crash. The Antilock Brake System (ABS) and Dynamic Stability Control (DSC) system may also not function, which could affect vehicle handling and control. Please note that higher pedal force may be required.

However, fully mechanical braking is not affected. If the IB module is not functioning properly, the parking (emergency) brake will be automatically activated to aid in braking performance. Also, the emergency function of the brake force distribution system remains available to help maintain vehicle stability and control.

If you notice any of these conditions, your vehicle may be experiencing this issue. Please drive carefully, and avoid abrupt braking as much as possible. Please contact an authorized MINI dealer as soon as possible to have the vehicle remedied.

If you are not the only driver of this vehicle, please advise all other drivers and passengers of this important information.

Q2a. What is the new issue? Why am I being contacted again?

Your vehicle needs to be checked to determine if the remedy was performed in accordance with specifications.

Q3. Why are other models / vehicles not included in this new Safety Recall?

For those vehicles, our analyses have determined that the remedy was performed in accordance with specifications.

Q4. Can I continue to drive my vehicle?

Yes. However, when you are notified by MINI of this Safety Recall that a remedy is available, please contact an authorized MINI dealer to schedule an appointment as soon as possible. For the latest updates to this Safety Recall, please visit mini.usa.com/recall. **If you are not the only driver of this vehicle, please advise all other drivers of this important information.**

Q5. How did BMW Group become aware of the issue?

BMW Group became aware of the issue through its quality control procedures.

Q6. How will I be informed of this Safety Recall?

**Safety Recall
26V-422
Integrated Brake (IB)
Model Year 2023-2025
MINI 2 Door, Countryman
06/25/2026**

Owners of potentially affected vehicles will be notified via First Class mail advising them of this Safety Recall, and to schedule an appointment with an authorized MINI dealer as soon as possible to have this Safety Recall performed. For the latest updates to this Safety Recall, please visit miniusa.com/recall.

To ensure MINI has the most up-to-date contact and vehicle information, owners should register their vehicle at miniusa.com. Registration is free and will give them access to other information specific for their MINI vehicle. Alternatively, owners can visit miniusa.com/recall and click on “**Manage recall notices and contact information**”.

Q7. How will my vehicle be remedied?

Potentially affected vehicles will have the Integrated Brake (IB) system checked and, if necessary, receive a software update, or have the IB system replaced and a software update performed, for free which should take several hours.

Q8. Do I have to wait for MINI to contact me to have the remedy performed?

No. Please contact an authorized MINI dealer as soon as possible to have the remedy performed. Please visit miniusa.com/dealer to locate your nearest authorized MINI dealer.
