**IMPORTANT SAFETY RECALL**
**NHTSA Safety Recall 26V-491**

**To: All Grand Design RV Dealers** September 14, 2026

Grand Design RV has determined that a noncompliance with Federal Motor Vehicle Safety Standard No. 120 exists in certain 2026-2027 Grand Design Lineage 31ZW5 motorhomes ordered with the optional LT295/65R20 wheel and tire package. On these units, the rear tire information label states a cold inflation pressure of 100 psi, which exceeds the 80 psi maximum cold inflation pressure of the installed tires. These units were built between 12/9/2025 and 5/15/2026. A recall to address this issue was initiated effective September 14, 2026.

**Description of the Defect**

Affected units were ordered with, or change-ordered to, the optional wheel and tire package (LT295/65R20 tires on 20-inch wheels). The rear tire information label on these units states a recommended cold inflation pressure of 100 psi, which exceeds the 80 psi maximum cold inflation pressure of the installed LT295/65R20 tires. This does not conform to S5.3.1 of FMVSS No. 120. A tire inflated to the labeled pressure is over-inflated by 25 percent, which increases the risk of tire failure and loss of vehicle control.

**Remedy**

On affected vehicles, dealers will remove the nonconforming tire information label and apply a corrected label stating 80 psi front and rear. The corrected label is supplied with the recall bulletin and no parts order is required. There will be no charge for this service. The required repair and claim instructions (operation code M910065) are attached to this letter and posted to the GDRV dealer portal.
