

GENERAL MOTORS

DCS 7543

URGENT - DISTRIBUTE IMMEDIATELY

Date: July 30, 2026

Subject: N262556920 - Safety Recall
Potential Steel Wheel Crack

Models: 2026 Chevrolet Silverado EV
2026 GMC Sierra EV

General Motors is releasing Safety Recall N262556920 today. The total number of U.S. vehicles involved is 911.

This bulletin contains an inspection procedure for both dealer inventory and customer vehicles. Vehicles that pass this inspection procedure can be delivered and closed using the “Inspect Spare Wheel Only – No Further Action Required” labor code 9108506. **Unsold vehicles that DO NOT PASS the inspection must be held and not delivered to customers.** This bulletin will be updated when the required parts become available, at which time those vehicles can be repaired, closed and delivered.

What Should Dealers Do: Dealers should review IVH, or the Dealer Maxis reports for open VINs in their inventory. Dealers can view the attached bulletin, and it will also be displayed in Service Information tomorrow.

The Stock VIN list of vehicles in dealer inventory or in-transit is attached to this message. Note: this list is only accurate at the time of report creation and all VINs should be validated in IVH prior to repair.

Because this recall involves equipment/parts also sold over-the-counter, dealers must search their sales records for over-the-counter sales and provide the recall notice to the purchaser. For recalled equipment sold as a dealer-installed option at the time of vehicle

purchase; these VINs will be available on the Investigate Vehicle History (IVH) screen in GM Global Warranty Management (GWM) system and GM will contact these customers.

Please search your part-sales records for over-the-counter sales and for vehicles repaired since October 21, 2025 of the recalled equipment (p/n 85535663 & 85162242), and communicate to the purchaser of record the recall notice. If the purchaser is a body shop, independent repair shop, or other third-party automotive repair or distribution business, dealers are to notify the purchaser and provide a copy of the recall notice. In either case, the communication of the recall notice should be done as soon as reasonably possible.

For dealers with involved vehicles, a listing has been prepared and will be available through GM Global Connect Maxis Field Action Reports or GWM Field Action Batch Search Report. The Inventory tab of the dealer reports will contain VINs that apply to this field action. This information is intended to assist dealers with the **PROMPT COMPLETION** of these vehicles. The Customer In-Service tab will contain customer names and addresses from Motor Vehicle Registration Records. The use of such motor vehicle registration data for any purpose other than follow-up necessary to complete this field action may be a violation of law in several states.
