

New Safety Recall Advanced Communication – 84D

FCA US LLC (FCA US) has announced a safety recall on certain 2023-2025 Model Year (GG) Dodge Hornet and 2023-2026 Model Year (GC) Alfa Romeo Tonale vehicles.

VINs identified as being involved in this campaign are currently live and searchable.
Stop sale is in effect for the above-identified vehicles.

Vehicles impacted by a stop sale are eligible for reimbursement allowance through the Recall Floorplan Reimbursement Policy (RFPRP), which can be requested upon recall claim submission.

IMPORTANT: Some of the involved vehicles may be in dealer new vehicle inventory. Federal law requires you to complete this recall service on these vehicles before retail delivery. Violation of this requirement by a dealer could result in a civil penalty of up to \$27,874 per vehicle. Involved vehicles can be determined by using the VIP inquiry process.

REASON FOR THIS SAFETY RECALL

Some of the above vehicles may have been built with rear outboard seat belts which can become twisted during seat belt usage. Rear outboard seatbelts that become twisted may not retract freely or maintain tension against the occupant. Seatbelts that do not freely retract or maintain tension do not provide the designed occupant restraint function, which can increase the risk of injury to occupants during certain types of crashes.

SERVICE ACTION

FCA US will conduct a voluntary safety recall to replace the rear outboard seat belt retractors. The remedy for this condition is not currently available. Dealers will be notified of the launch of this safety recall by way of established communication methods. This recall is estimated to launch in 3rd Quarter of 2026.

We ask that you please take the time to ensure that your personnel are aware of this communication and are prepared to execute a customer friendly process for inquiries regarding involved vehicles.
