New Safety Recall Advanced Communication – 61D

FCA US LLC (FCA US) has announced a safety recall on certain 2021 through 2023 Model Year (WD) Dodge Durango vehicles.

REASON FOR THIS SAFETY RECALL

Some of the above vehicles were built with rear spoilers that may be over-flush to the roof, allowing contact to the roof when cycling the liftgate. An over-flush rear spoiler may become damaged when cycling the liftgate which may result in the spoiler becoming detached from the vehicle. Rear spoilers which detach from a vehicle may create road debris and increase the risk of a vehicle crash.

SERVICE ACTION

FCA US will conduct a voluntary safety recall on all affected vehicles. The remedy is under development. Dealers will be notified of the launch of this safety recall by way of established communication methods.

We ask that you please take the time to ensure that your personnel are aware of this communication and are prepared to execute a customer friendly process for inquiries regarding involved vehicles.
