General Motors is releasing Safety Recall A262554900 today.

**This is a phased launch with limited parts availability.**

As additional parts become available, more VINs will be placed in an OPEN status, and this bulletin may be revised to include WCAP and Floor Plan reimbursement.

**Important: There may be a short delay on part order fulfillment and/or may go into backorder, however parts are actively being distributed nationwide and orders will be filled as quickly as possible.**

Dealers must verify that the VIN shows in an OPEN status in Investigate Vehicle History (IVH) prior to performing the service procedure contained in this bulletin.

Certain vehicles involved in this recall were placed on stop delivery August 20, 2026. For vehicles that are in an OPEN status, once the service procedure contained in this bulletin has been performed on the vehicle, the vehicle is released from stop delivery and the vehicle can be delivered to the customer.

What Should Dealers Do: Dealers should review IVH, or the Dealer Maxis reports for open VINs in their inventory. Dealers can view the attached bulletin, and it will also be displayed in Service Information tomorrow.

The Stock VIN list of vehicles in dealer inventory or in-transit is attached to this message. Note: this list is only accurate at the time of report creation and all VINs should be validated in IVH prior to repair.

For dealers with involved vehicles, a listing has been prepared and will be available through GM Global Connect Maxis Field Action Reports or GWM Field Action Batch Search Report. The Inventory tab of the dealer reports will contain VINs that apply to this field action. This information is intended to assist dealers with the **PROMPT COMPLETION** of these vehicles. The Customer In-Service tab will contain customer names and addresses from Motor Vehicle Registration Records. The use of such motor vehicle registration data for any purpose other than follow-up necessary to complete this field action may be a violation of law in several states.
