LPG Securement and Remote LPG Shut Off Valve

Dear Tiffin Motorhome Dealer,

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

Tiffin Motorhomes has decided that a defect which relates to motor vehicle safety exists in the following models of motorhomes, **2026 Wayfarers, 25 RW floorplan only, and 2027 Wayfarers, all floorplans, that are equipped with liquid propane gas (LPG) and that were built between July 30, 2025, and August 24, 2026.**

These motorhomes are equipped with an LPG tank that may be secured with an incorrect mounting bracket, and these LPG tanks do not have a remote shut off valve installed. An incorrectly mounted LPG tank could become loose and detach, which would increase the risk of an accident. If owners cannot easily access the shut off valve on the LPG tank, there is an increased risk of fire.

Tiffin Motorhomes will inspect and replace any incorrect bracket with the correct bracket to secure the LPG tank. Tiffin Motorhomes will also install a remote LPG tank valve and install a switch for the remote valve in an area easily accessible to owners.

Owners will be notified by mail about the recall and instructed to take their motorhome to a reputable service center **OR** dealer of **their** choice to have the repair completed. Tiffin Motorhomes is allowing up to 2 hours to have this recall repair completed. This recall repair will be completed at no charge to the owner of the motorhome.

Please verify the motorhome is involved in this recall **before** beginning the repair. To verify a motorhome's involvement in this recall, please visit our website, www.tiffinmotorhomes.com.
