

New Safety Recall Advanced Communication – 83D

FCA US LLC (FCA US) has announced a safety recall on certain 2025-2026 model year (DT) Ram 1500 pickup trucks.

REASON FOR THIS SAFETY RECALL

Some of the above vehicles may have suspect radio software, which may prevent the rearview image from displaying when shifting to reverse. Failure to display a rearview image can increase the risk of a crash.

The condition described above does not comply with Federal Motor Vehicle Safety Standard (FMVSS) No. 571.111 S6.2.6 requires that "The rear visibility system default to the rearview image being visible and meet the requirements of FMVSS No. 571.111 S6.2.1 (field of view) and S6.2.2 (image size) at the beginning of each backing event, regardless of any modifications to the field of view that the driver had previously selected..." and apply to other markets via direct reference to FMVSS or are implied via free trade agreements. Suspect vehicles may not display the rearview image during a backing event.

SERVICE ACTION

FCA will conduct a voluntary safety recall on all affected vehicles to update the radio software. The remedy for this condition is not currently available. Dealers will be notified of the launch of this safety recall by way of established communication methods. This recall is estimated to launch in 3rd Quarter of 2026.

We ask that you please take the time to ensure that your personnel are aware of this communication and are prepared to execute a customer friendly process for inquiries regarding involved vehicles.
