DATE: **October 2026**

TO: **Micro Bird Distributors**

SUBJECT: **Recall 26-122-HVS / NHTSA Recall 26V591**

This notice is sent to you in accordance with the requirements of the Motor Vehicle Safety Act. This is to inform you that your school vehicle(s) may contain a defect that could affect the safety of a person.

Micro Bird has decided that a defect which relates to motor vehicle safety exists in certain 2025-2027 G5 EV school buses.

The recalled school vehicles are equipped with electrical harness E109884 connecting multiple functions, that may become damaged from abrasion, resulting in a potential disruption of system functions. The disruption may affect safety functions, such as prevent charging (charging port), or even cause the shutdown of the vehicle, increasing the risk of a crash.

To complete this recall, owners will contact you to make an appointment to have their vehicle(s) corrected. The correction consists in securing the electrical harness E109884 to ensure proper clearance with surrounding structures that can cause abrasion. The dealer will inspect the electrical harness and replace it if damaged. We evaluate that it should take 1.5 hour per vehicle to secure the harness and 1 hour more if the harness needs replacing.

Micro Bird USA LLC will provide correction instructions, as well as provide replacement harness if necessary and reimburse labor to mitigate this recall at no charge.

Important: **We want to remind you that recalled vehicles must be corrected before you sell, lease, or deliver them; vehicles returned at the end of a lease must be corrected before they can be offered for sale as used vehicles.**

We apologize for any inconvenience this situation may cause and we thank you for your cooperation.
